INTER-AMERICAN INVESTMENT CORPORATION

Financial Statements December 31, 2021 and 2020

KPMG LLP Suite 12000 1801 K Street, NW Washington, DC 20006

Independent Auditors' Report

Board of Governors Inter-American Investment Corporation:

Opinion

We have audited the financial statements of Inter-American Investment Corporation (the Corporation), which comprise the balance sheets as of December 31, 2021 and 2020, and the related income statements and the statements of comprehensive income/(loss), changes in capital, and cash flows for the years then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Corporation as of December 31, 2021 and 2020, and the results of its operations and its cash flows for the years then ended in accordance with U.S. generally accepted accounting principles.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Corporation and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with U.S. generally accepted accounting principles, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Corporation's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are
 appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of
 the Corporation's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Corporation's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

Other Information

Management is responsible for the other information included in the Information Statement of the Inter-American Investment Corporation and the Annual Report as of December 31, 2021. The other information comprises management's description of their business, risk management, administration and governance processes as well as management's discussion and analysis of financial results, but does not include the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audits of the financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Notes to Financial Statements

1. Purpose

The Inter-American Investment Corporation (IDB Invest) is an international organization established in 1986 and a separate legal entity within the Inter-American Development Bank Group (the IDB Group), which also includes the Inter-American Development Bank (IDB) and the Multilateral Investment Fund (commercially known as IDB Lab). IDB Invest began operations in 1989, and is owned by its member countries, which include 26 regional developing member countries, located in Latin America and the Caribbean (the Regional Developing Member Countries), and 21 countries outside of Latin America and the Caribbean. The purpose of IDB Invest is to promote the economic development of its Regional Developing Member Countries by encouraging the establishment, expansion, and modernization of private enterprises in such a way as to supplement the activities of the IDB. IDB Invest provides financing through its development related investments, which include loans, guarantees, investments in debt securities, and equity investments where sufficient capital is not otherwise available on adequate terms in the market. IDB Invest also arranges financing from other investors through loan participations, co-financing arrangements, and unfunded participations. In addition, IDB Invest provides financial and technical advisory services to clients.

2. Summary of Significant Accounting Policies

Basis of presentation – These financial statements are prepared in accordance with generally accepted accounting principles in the United States of America (US GAAP). References to US GAAP issued by the Financial Accounting Standards Board (FASB) in these notes are to the FASB Accounting Standards Codification (ASC or Codification) or Accounting Standards Update (ASU).

All amounts presented in the accompanying financial statements and notes are expressed in United States dollars (USD, US\$ or \$), which is IDB Invest's functional and reporting currency.

Use of estimates – The preparation of the financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Actual results could differ from those estimates. A significant degree of judgment has been used in the evaluation and measurement of: the allowance for credit losses; other-than-temporary impairments on equity investments measured at cost; the fair value of investment securities, development related investments (loans, debt securities and equity investments), derivative instruments and borrowings; and the projected benefit obligations and fair value of plan assets of the Pension Plans and Postretirement Benefits Plan and associated net periodic benefit cost of each plan.

Cash and cash equivalents – Cash and cash equivalents¹ include those amounts held on deposit with banks, highly liquid investments purchased with original maturities of three months or less, and cash restricted for development related investment activities. IDB Invest may hold cash deposits in excess of Federal Deposit Insurance Corporation (FDIC) insured limits.

Investment securities – Investment securities include fixed and floating rate bonds, notes, bills issued by corporations, governments, supranationals or agencies, and certificates of deposit, commercial paper and mutual funds, including money market funds. IDB Invest's strategy for its Cash and cash equivalents¹ and Investment securities (collectively, Liquid Assets) is to provide sufficient liquidity and resources to finance development related investments.

¹ References to captions in the financial statements are identified by the name of the caption beginning with a capital letter every time they appear in the notes to the financial statements.

Notes to Financial Statements

Investment securities are classified as trading and are recorded at fair value with gains and losses reported in income from Gain/(loss) from liquid assets, net. Purchases and sales of securities are recorded on a trade date basis. The first-in, first-out method is used to determine the cost basis of securities sold.

Development related loans and debt securities (Development related debt investments) – Development related loans and debt securities are recognized upon disbursement and measured at amortized cost or at fair value through income, depending on the nature and terms of each instrument. An allowance for credit losses is recognized against development related debt investments measured at amortized cost. The net asset value (NAV) is used as a practical expedient for the fair value measurement for certain development related debt securities. Refer to Note 4 for additional information.

For credit monitoring and portfolio management purposes, development related loans are classified into three portfolio segments – corporates, financial institutions and project finance – and development related debt securities are classified as corporate securities.

Development related loans may be secured by mortgages, third-party guarantees or other forms of collateral security or may be unsecured. IDB Invest enters into standalone insurance contracts, which are generally not transferable, to cover the credit risk of particular development related debt investments. IDB Invest recognizes the recovery assets associated with these third-party credit enhancements in Receivables and other assets in the balance sheets and any associated gains or losses from such assets as Interest and other income in the income statements.

Guarantees – IDB Invest issues guarantees covering, on a risk-sharing basis, third party obligations or securities issuances in Regional Developing Member Countries. IDB Invest's policy with respect to collateral security for these guarantees is generally the same as for its development related loans. Guarantees are regarded as issued when IDB Invest executes the guarantee agreement, outstanding when the underlying obligation of the third party is incurred and called when IDB Invest's obligation under the guarantee has been invoked. There are two obligations associated with guarantees: (1) a stand-ready obligation to perform; and (2) a contingent obligation to make future payments. The stand-ready obligation to perform is recognized at fair value at the issuance date, typically in an amount equal to the present value of any premiums received or receivable. For financial guarantees not accounted for as derivatives, the contingent liability is measured based on the current expected credit losses (CECL) on the guarantee. For guarantees that do not qualify for the derivative accounting scope exception, the contingent liability is measured at fair value through income from the issuance date.

The stand-ready and contingent liabilities associated with the guarantees issued by IDB Invest are included in Payables and other liabilities in the balance sheets. Changes in contingent liabilities measured under the CECL methodology are recorded in (Provision)/release of provision for credit losses on development related investments in the income statements, while changes in contingent liabilities measured at fair value through income are recorded through Gain/(loss) from changes in fair value on non-trading portfolios and foreign exchange transactions, net in the income statements. Guarantee fee income is recognized as IDB Invest is released from its stand-ready obligation to perform and recorded in Interest and other income in the income statements. In the event a guarantee is called, the amount disbursed is recorded as a development related loan and an allowance is established based on the CECL methodology.

Undisbursed commitments – IDB Invest estimates expected credit losses over the contractual period in which it is exposed to credit risk through a contractual obligation to extend credit unless IDB Invest has the discretion to cancel the commitment at any time (unconditionally cancellable). The estimate considers the likelihood that funding will occur and the expected credit losses on estimated funded commitments over their estimated lives. A contingent liability for off-balance sheet credit losses is recorded in Payables and other liabilities in the balance sheets. The expense related to the contingent liability is recorded in (Provision)/release of provision for credit losses on development related investments in the income statements.

Allowance for credit losses – The allowance for credit losses represents management's estimates of current expected credit losses over the remaining expected lives of development related debt investments measured at amortized cost. The allowance for credit losses and the contingent liability for off-balance sheet credit

Notes to Financial Statements

exposures consider historical credit loss information as adjusted for current conditions and reasonable and supportable (R&S) forecasts of future economic conditions in the related portfolio. Changes in the allowance for credit losses are recorded through the (Provision)/release of provision for credit losses in the income statements. IDB Invest does not record an allowance for credit losses on accrued interest receivable as it has a substantive nonaccrual policy.

Expected prepayments are factored into the estimate of expected credit losses on development related debt investments. Projected disbursements are factored into the estimate of expected credit losses on off-balance sheet credit exposures, considering historical experience and contractual amortization schedules. Prepayment assumptions are based on historical data from IDB Group's private sector portfolio given the common portfolio characteristics, which include the borrower's country, risk rating and industry sectors. The contractual term excludes expected extensions, renewals, and modifications unless either of the following applies: (i) management has a reasonable expectation at the reporting date that a troubled debt restructuring (TDR) will be executed with an individual borrower or (ii) the extension or renewal options are included in the original or modified contract at the reporting date and are not controlled by IDB Invest (not unconditionally cancellable by IDB Invest).

The collective assessment of current expected credit losses is based on exposure at default (EAD), Point in Time (PIT) term structures for probability of default (PD) and loss given default (LGD). In addition, the CECL estimate incorporates forward looking conditioning, which takes into consideration current market conditions, macroeconomic forecasts and their corresponding impact to the PIT PDs and LGDs. The macroeconomic forecasts in the CECL model include various scenarios, where each scenario represents a different state of the economy in the R&S period. Management currently considers the R&S period to be three years, after which the model reverts to historical averages for long-term values over a two year period using a linear method for PD mean-reversion. For each scenario, a lifetime loss rate for each instrument is calculated using the appropriate PD and LGD for every quarter of the remaining life of the instrument. The results are then multiplied by the instrument's amortized cost. If multiple scenarios are considered, then results are weighted.

IDB Invest assigns a risk rating to each borrower and each development related debt investment based on a periodic risk assessment. The risk ratings assigned to the borrower and the investment correspond to specific PDs and LGDs and are determined based on a series of sector specific scorecards, which are aligned to IDB Invest's portfolio segments — corporates, financial institutions and project finance. IDB Invest maps internal ratings to long-term PDs published annually by an international rating agency. For LGDs, IDB Invest uses a decision-tree scorecard model developed by an international rating agency to capture exposure specific information, such as seniority, guarantees, collateral, industry, and jurisdiction at the facility level, which vary across different exposures of the same borrower.

The major credit risk factors considered for a project finance development related debt investment may be grouped into the following categories: political risk, commercial or project risk, technical and construction risk, and financial risk. Political risks can be defined as the risks to a project's financing emanating from governmental sources, either from a legal or regulatory perspective. Commercial or project risks are related to the construction or completion risks, economic or financial viability of a project and operational risks. Financial risks consider the project's exposures to cash flow generation, interest rate and foreign currency volatility, inflation risk, liquidity risk, and funding risk.

The major credit risk factors considered for a development related debt investment to a financial institution are country-related risk including regulatory, competition, government support and macro-economic risks, which act as an anchor for the risk assessment as a whole. Additionally, the rating scorecard assesses the following institution-specific factors: capital adequacy, asset quality, operating policies and procedures and risk management framework; quality of management and decision making; earnings and market position, liquidity and sensitivity to market risk; quality of regulations and regulatory agencies; and potential government or shareholder support.

The major credit risk factors considered for corporate development related debt investments are country and industry risks, business and market risks, an assessment of the borrower's management, and financial risks, including a qualitative assessment of financial risks and a quantitative assessment of financial ratios. After

Notes to Financial Statements

consideration of these borrower specific characteristics, extraordinary support from shareholders or from the government may be considered if applicable.

To augment the quantitative process described above, qualitative adjustments arising from information lags implicit in the quantitative loss estimation models, known model or data limitations, significant changes in portfolio composition or lending operations and uncertainty associated with economic and business conditions are applied as necessary based on management's judgment.

The recent global crisis triggered by the COVID-19 pandemic has had a direct effect on economies within IDB Invest's Regional Developing Member Countries. The crisis affected risk parameters of the portfolio used in the CECL methodology, such as internal risk ratings for specific industries and countries. These parameters also consider the deterioration in the macroeconomic forecasts during the R&S period and a mean reversion period to historical losses.

IDB Invest individually assesses the current expected credit losses on development related debt investments that have been or are reasonably expected to be restructured through a TDR. The determination of the allowance for credit losses for these investments reflects management's best judgment of the creditworthiness of the borrower and is established based upon the periodic review of individual development related debt investments. This estimate considers all available evidence including, as appropriate, the present value of expected future cash flows, the fair value of collateral less disposal costs, and other market data. Due to the nature of the development related debt investments, secondary market values are usually not available. For these investments, IDB Invest also considers the effects of the modification in its determination of the allowance for credit losses.

A modification of a development related debt investment is considered a TDR when the borrower is experiencing financial difficulty and IDB Invest has granted a concession to the borrower that it otherwise would not grant in order to maximize recoveries. IDB Invest monitors its development related debt investments for signs that the borrower may be facing financial difficulty. Information and events considered in determining whether a TDR is reasonably expected include the borrower's financial situation and competitive position in the marketplace, the risk associated with the underlying collateral, the willingness and capacity of the sponsor who organized the project to support the investment, the borrower's management team, and geopolitical and macroeconomic factors.

In light of the COVID-19 pandemic, IDB Invest has implemented loan modifications for loans that were otherwise performing in response to requests from borrowers for short-term relief. Modifications that meet the conditions set forth in the Interagency Statement² are not accounted for as TDRs. Additional information is included in Note 4.

Development related debt investments are partially or fully written off when IDB Invest has exhausted all possible means of recovery through a legal agreement, final bankruptcy settlement or when IDB Invest has determined with a reasonable degree of certainty that the relevant amount will not be collected. IDB Invest reduces the investment and related allowance for credit losses. Such reductions in the allowance are partially offset by recoveries, if any, associated with previously written off development related debt investments.

Revenue recognition on development related debt investments – Interest on development related debt investments is included in Interest and other income in the income statements. Accrued interest income receivable is presented separately from development related debt investments and is included in Receivables and other assets in the balance sheets.

Development related debt investments are generally placed in nonaccrual status when collectability is in doubt or payments of interest or principal are past due more than 90 days. IDB Invest does not accrue income and ceases amortization of any premiums or discounts on development related debt investments in nonaccrual status. Any uncollected interest accrued on a development related debt investment placed in nonaccrual status is reversed out of income and is thereafter recognized as Interest and other income in the income statements

² The Interagency Statement on Loan Modifications and Reporting for Financial Institutions Working with Customers Affected by the Coronavirus was issued jointly by the Board of Governors of the Federal Reserve System, the Federal Deposit Insurance Corporation, the National Credit Union Administration, the Office of the Comptroller of the Currency, and the Consumer Financial Protection Bureau.

Notes to Financial Statements

when the payment is received. A development related debt investment is returned to accrual status once management has concluded that the borrower has demonstrated its ability to make periodic interest and principal payments.

Development related debt investment fees and costs are deferred and amortized over the life of the asset on a straight-line basis. Amortization of the net deferred fees and costs is included in Interest and other income in the income statements thereby approximating how fees and costs would be reflected under the effective interest method. The net deferred amounts are included in Payables and other liabilities in the balance sheets.

Equity investments – Equity investments include certain ownership interests in limited partnerships and similar fund structures (LPs) and direct equity investments primarily in small and medium-sized enterprises and financial institutions.

IDB Invest accounts for its equity investments at fair value through income, except for equity investments without readily determinable fair values that are accounted for under the cost-based measurement alternative. For investments in entities over which IDB Invest has significant influence, IDB Invest elects the fair value option in lieu of applying the equity method of accounting.

IDB Invest utilizes the net asset value (NAV) reported by the fund managers as a practical expedient for the fair value measurement of interests in LPs. The NAVs that have been reported by the fund manager are derived from the fair values of the underlying investments.

Equity investments accounted for under the cost-based measurement alternative are recorded at cost less impairment plus or minus adjustments resulting from observable price changes in orderly transactions for the identical investment or a similar investment of the same issuer. Adjustments related to impairment and observable price changes, if any, are recorded in Unrealized gain/(loss) from changes in fair value and measurement adjustments, net in the income statements. IDB Invest may subsequently elect to measure an equity investment that continues to qualify for the cost-based measurement alternative at fair value. Such election is irrevocable, and any resulting gains or losses would be recorded through income at the time of election and thereafter.

Equity investments accounted for under the cost-based measurement alternative are assessed for impairment periodically based on the latest financial information, operating performance and other relevant information including macroeconomic conditions, specific industry trends, the historical performance of the company, and IDB Invest's intent to hold the investment for an extended period. When impairment is identified, the investment is written down to its estimated fair value, which becomes the new carrying value for the investment.

Revenue recognition on equity investments – Dividends and profit participations received from equity investments are recorded as income and reported in Realized gain/(loss) from sales, dividends and other income, net in the income statements. Gains or losses on the sale or redemption of equity investments accounted for under the cost-based measurement alternative are recorded as income/(loss) upon disposition and reported in Realized gain/(loss) from sales, dividends, and other income, net in the income statements.

For equity investments accounted for at fair value, unrealized gains and losses are recorded as Unrealized gain/ (loss) from changes in fair value and measurement adjustments, net in the income statements. Disbursements and distributions that represent return of capital are recorded as changes to the outstanding balance of these equity investments and recorded in Equity investments in the balance sheets.

Consolidation, non-controlling interests, variable interest entities – IDB Invest evaluates its variable interests in legal entities upon commitment, at the time of modification, if applicable, and on an annual basis to determine whether it must consolidate any entity. Pursuant to ASC 810, *Consolidation*, IDB Invest is required to consolidate an entity if (a) the entity is a variable interest entity (VIE) for which IDB Invest is the primary beneficiary or (b) the entity is not a VIE and IDB Invest has a controlling financial interest.

Notes to Financial Statements

A variable interest is a contractual, ownership or other pecuniary interest in a VIE whose value changes as the fair value of the VIE's net assets change. A legal entity is a VIE if (i) it lacks sufficient equity to permit the entity to finance its activities without additional subordinated financial support or (ii) the equity investors, as a group, lack (a) the power, through voting or similar rights, to direct the activities of the entity that most significantly impact the entity's economic performance; (b) substantive voting rights; (c) the obligation to absorb the expected losses of the entity; or (d) the right to receive the expected residual returns of the entity.

The primary beneficiary is the party with the power to direct the activities that most significantly impact the VIE's economic performance and the obligation to absorb losses of the entity or the right to receive benefits of the VIE that could potentially be significant to the entity. Additional information about VIEs is included in Note 4.

Revenue recognition for service fees – IDB Invest recognizes revenue in connection with services it provides to the IDB and trust funds administered by the IDB or IDB Invest. A series of service level agreements (SLAs) define the nature of the services and corresponding fees for services provided to the IDB. The most significant of these services relates to loan origination and servicing performed on the IDB's behalf. IDB Invest recognizes revenue for these services as it fulfills its performance obligation over the annual service period. Similarly, IDB Invest receives project administration and general administrative fees for services provided to several special purpose trust funds administered by IDB Invest or the IDB. Additional information about related party transactions is included in Note 13.

Risk management and use of derivative instruments – IDB Invest uses derivative instruments primarily for market risk management purposes in connection with its principal business activities. IDB Invest enters into cross currency and interest rate swaps to manage foreign exchange and interest rate risks arising from mismatches between its development related debt investments and its borrowing liabilities. None are designated as hedging instruments under ASC 815, *Derivatives*.

Derivatives are recognized in the balance sheets at their fair value and are classified as either Derivative assets or Derivative liabilities. Changes in fair value of derivatives are recorded in Gain/(loss) from changes in fair value on non-trading portfolios and foreign exchange transactions, net, in the income statements. Additional information about derivatives is included in Note 7.

Fixed and intangible assets – Fixed assets consist of office equipment and furniture and intangible assets consist of internally-developed software. Fixed and intangible assets are presented at cost less accumulated depreciation and amortization and are included in Receivables and other assets in the balance sheets. Depreciation and amortization are recognized using the straight-line method over the estimated useful lives of the assets that range from three to seven years.

Leases – IDB Invest leases office space from the IDB at its headquarters and in its Regional Developing Member Countries. IDB Invest recognizes these leases as operating leases under ASC 842, *Leases*.

IDB Invest recognizes a right-of-use asset and lease liability in the balance sheets for each operating lease based on the present value of the future minimum lease payments over the lease term. The right-of-use assets are nonmonetary assets included in Receivable and other assets in the balance sheets and are amortized based on each period's discounted cash flows. Lease liabilities are monetary liabilities included in Payables and other liabilities in the balance sheets and are reduced based on each period's discounted cash flows. Lease liabilities are monetary liabilities included in Payables and other liabilities in the balance sheets and are reduced based on each period's discounted cash flows. IDB Invest remeasures its lease liabilities originating in currencies other than US\$ at the exchange rate in effect at each reporting date. Operating lease expense is recorded on a straight-line basis and included in Administrative expenses in the income statements. Additional information related to IDB Invest's leases is included in Notes 5, 8, and 12.

Borrowings – To ensure funds are available for its operational liquidity needs, IDB Invest offers its debt securities to investors in international capital markets. IDB Invest's borrowings are carried at amortized cost or fair value in the balance sheets.

Notes to Financial Statements

For those borrowings carried at amortized cost, the amortization of premiums and accretion of discounts is calculated following a methodology that approximates the effective interest method and is included in Borrowings expense in the income statements. The unamortized balance of the borrowing issuance costs related to a recognized debt liability is included as a direct deduction from the carrying amount of the Borrowings in the balance sheets. Interest expense on all borrowings is recognized on an accrual basis and is included in Borrowings expense in the income statements.

For those borrowings carried at fair value, fair value changes are reported in accordance with ASU 2016-01, *Financial Instruments*. Accordingly, the change in fair value resulting from changes in instrument-specific credit risk is reported in Unrealized gains/(losses) arising during the period related to fair value adjustments on borrowings attributable to changes in instrument-specific credit risk, net, in the statements of other comprehensive income, while the remaining change in fair value is reported in Gain/(loss) from changes in fair value on non-trading portfolios and foreign exchange transactions, net in the income statements. Additional information about borrowings is included in Note 6.

Non-trading portfolio – IDB Invest's non-trading portfolio includes development related debt investments, derivatives, and borrowings accounted for at fair value. The reported income volatility resulting from these non-trading financial instruments is not fully representative of the underlying economics of the transactions as IDB Invest does not intend to actively trade such instruments. Therefore, Gain/(loss) from changes in fair value on non-trading portfolios and foreign currency transactions, net, are reported separately from Income/(expense) from development related investments, liquid assets and other income, net of borrowing expenses in the income statements. Additional information about the non-trading portfolio is included in Note 11.

Remeasurements of foreign currency transactions – Monetary assets and liabilities denominated in currencies other than the US\$ are translated into US\$ at market exchange rates prevailing at the balance sheet dates. Income and expenses are translated at the market exchange rate in effect at the transaction date or at monthly average rates. Resulting gains and losses from remeasurements are generally included in Gain/(loss) from changes in fair value on non-trading portfolios and foreign exchange transactions, net in the income statements.

Fair value measurements – ASC 820, *Fair Value Measurements* requires entities to disclose information about recurring and non-recurring fair value measurements, as well as the fair value of financial instruments.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transfer between market participants at the measurement date under current market conditions. Fair value measurement further assumes that a transaction to sell the asset or assume a liability takes place either in the principal market or, in the absence of a principal market, in the most advantageous market for the asset or liability.

In determining fair value, IDB Invest uses various valuation approaches, including market, income, or cost approaches. The Codification establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the observable inputs be used when available. Observable inputs are inputs developed based on market data obtained from sources independent of IDB Invest that reflect assumptions market participants would use in pricing the asset or liability. Unobservable inputs are inputs for which market data is not available and are developed using the best information available about the assumptions market participants would use in pricing the asset or liability. The hierarchy is broken down into three levels based on the reliability of inputs as follows:

• Level 1—Inputs are based on unadjusted quoted prices for identical assets or liabilities in active markets.

Assets and liabilities utilizing Level 1 inputs include debt securities and equity investments that are actively traded and primarily include debt securities of the United States government and agencies.

Notes to Financial Statements

Level 2—Inputs are based on quoted prices for similar assets or liabilities in active markets; quoted prices
for identical or similar assets or liabilities that are not actively traded; or pricing models for which all
significant inputs are observable, directly or indirectly, for substantially the full term of the asset or liability.

Assets and liabilities utilizing Level 2 inputs include money market funds, investment securities, and investments in obligations of banks, governments and agencies or instrumentalities other than the United States, sovereigns, local and regional governments, corporate bonds, borrowings, and derivative instruments that are not actively traded.

• Level 3—Inputs are unobservable and significant to the overall fair value measurement.

Assets utilizing Level 3 inputs include loans, development related debt securities, equity investments, and borrowings that are measured for which observable inputs are not available.

The availability of observable inputs is affected by a wide variety of factors, including, for example, the type of product, and other characteristics particular to the transaction. To the extent fair value is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3.

Fair value for the majority of IDB Invest's financial instruments is derived using pricing models. Pricing models consider the contract terms, including amortization schedule and maturity, where applicable, and other inputs, including, where applicable, interest rate yield curves, credit spreads, creditworthiness of the counterparty, option volatility, and currency rates. In accordance with ASC 820, the impact of IDB Invest's own credit spreads would also be considered when measuring the fair value of liabilities. Where appropriate, valuation adjustments are made to account for various factors, including bid-ask spreads, credit quality, and market liquidity. These adjustments are applied on a consistent basis and are based upon observable inputs, where available. Additional information about fair value measurements is included in Note 10.

Fair value option – The Fair Value Option (FVO) under ASC 825, *Financial Instruments*, permits the measurement of eligible financial assets, financial liabilities and firm commitments at fair value on an instrument-by-instrument basis, that are not otherwise permitted or required to be accounted for at fair value under other accounting standards. IDB Invest has elected the FVO for the following classes of financial assets and liabilities: i) certain investments in development related debt securities that IDB Invest does not have the ability and intent to hold until maturity, ii) certain hybrid development related debt investments, iii) investments in equity securities for which a measurement alternative is no longer applied, and v) certain borrowings that are economically hedged with derivative financial instruments.

Financial assets and borrowings elected under the FVO are measured at fair value on a recurring basis and changes in fair value of these financial instruments are included in Gain/(loss) from changes in fair value on non-trading portfolios and foreign exchange transactions, net, in the income statements. Interest income on these financial instruments is recognized on an accrual basis, where applicable.

Loan participations – IDB Invest mobilizes funds from commercial banks and other financial institutions (Participants) by facilitating loan participations, without recourse. These loan participations are administered and serviced by IDB Invest on behalf of the Participants in exchange for a fee. Such fees are recognized upon receipt and are reported in Mobilization fees and other income in the income statements. The disbursed and outstanding balances of loan participations that meet the requirements to be accounted for as sales are not included in IDB Invest's balance sheets.

Pension and postretirement benefits – IDB Invest is a sponsor of the Staff Retirement Plan (SRP) and the Complementary Staff Retirement Plan (CSRP) (the Pension Plans), which are defined benefit pension plans jointly managed with the IDB. Under the Pension Plans, benefits are based on years of service and level of

Notes to Financial Statements

compensation, and plan assets include contributions by employees and by IDB Invest and the IDB for their respective employees. Any and all contributions to the Pension Plans are irrevocable and are held separately in retirement funds solely for the payment of benefits under the Pension Plans

IDB Invest also provides certain health care, tax reimbursement and other postretirement benefits to eligible retirees under its Postretirement Benefits Plan (PRBP), which is also jointly managed by the IDB. Retirees contribute toward the PRBP based on an established premium schedule. IDB Invest and the IDB contribute the remainder of the actuarially determined cost of future health care and other benefits for their respective employees. All contributions and other assets and income of the PRBP remain the property of IDB Invest and the IDB, but are held and administered separately and apart from the other property and assets of each employer solely for the purpose of payment of benefits under the PRBP.

Since both the IDB and IDB Invest are sponsors of the Pension Plans and the PRBP, each employer presents its respective share of these plans. The amounts presented reflect IDB Invest's proportionate share of costs, assets, and obligations of the Pension Plans and PRBP in accordance with ASC 715, *Compensation – Retirement Benefits*.

The service cost component of net periodic benefit costs allocated to IDB Invest is included in Administrative expenses and the other components are included in Other components of pension benefit costs, net, in the income statements. The separate funded statuses of the Pension Plans and the PRBP are included in Receivables and other assets when the respective Pension Plans or the PRBP is in a funded status, and included in Payables and other liabilities when the respective Pension Plans or the PRBP is in an underfunded status in the balance sheets. Additional information about the Pension Plans and PRBP is included in Note 14.

Taxes – IDB Invest, its property, other assets, income, and the operations and transactions it carries out pursuant to the Agreement Establishing the Inter-American Investment Corporation, are immune from all taxation and from all custom duties in its member countries. IDB Invest is also immune from any obligation relating to the payment, withholding or collection of any tax or duty in its member countries.

Accounting and financial reporting developments – In January 2020, the FASB issued ASU 2020-01, *Investments—Equity Securities (Topic 321), Investments—Equity Method and Joint Ventures (Topic 323), and Derivatives and Hedging (Topic 815)* Investments. The amendments in this Update clarify the interaction of the accounting for equity securities under Topic 321, investments accounted for under the equity method of accounting in Topic 323, and the accounting for certain forward contracts and purchased options accounted for under Topic 815. For IDB Invest, this Update is effective on January 1, 2021. This Update did not have a material impact on IDB Invest's financial statements.

In March 2020, the FASB issued ASU 2020-04, *Reference Rate Reform (Topic 848)*. This Update and related ASUs provide temporary optional expedients and exceptions to the US GAAP guidance on contract modifications and hedge accounting to ease the financial reporting burden of the expected marked transition from LIBOR and other interbank offered rates. To be eligible for the optional expedients, modifications of contractual terms that change (or have the potential to change) the amount or timing of contractual cash flows must be related to replacement of a reference rate. IDB Invest is exposed to LIBOR through its LIBOR-based development related debt investments, investment securities, borrowings and swaps. The amendments in this Update may be implemented any time before December 31, 2022. IDB Invest adopted this Update effective December 31, 2020. This Update did not have a material impact on IDB Invest's financial statements.

In October 2020, the FASB issued ASU 2020-08, *Codification Improvements to Subtopic 310-20, Receivables -Nonrefundable Fees and Other Costs.* The amendments in this Update state that for callable bonds purchased at a premium, an entity must reevaluate to ensure that the premium is not amortized to the earliest call date. For IDB Invest, this Update is effective on January 1, 2021. This Update did not have a material impact on IDB Invest's financial statements.

Loans	\$	32,377	\$	_	\$	720	\$	206		
Total	\$	32,377	\$	_	\$	720	\$	206		

There were no development related debt investments at amortized cost classified as nonaccrual without a related allowance for credit losses as of December 31, 2021 (none as of December 31, 2020). There were no development related debt securities in nonaccrual status as of December 31, 2021 (none as of December 31, 2020).

Notes to Financial Statements

During 2021, there were three TDRs related to financial institutions and corporate loans included in development related debt investments, which have an outstanding balance of \$6.8 million and individually assessed allowance for credit losses of \$2.3 million as of December 31, 2021. During 2020, there was one TDR related to a project finance loan included in development related debt investments with an outstanding balance of \$6.4 million and individually assessed allowance for credit losses of \$1.9 million as of December 31, 2020. IDB Invest does not have commitments to extend additional funds to borrowers whose terms have been modified in a TDR. There were no payment defaults on loans previously modified in a TDR.

During 2020, IDB Invest implemented loan modification measures in response to requests received from borrowers for short-term relief as a result of the COVID-19 pandemic. During 2021, IDB Invest evaluated loan modifications with a total outstanding balance of \$2.1 million and the relief provided included short-term deferrals of principal amounting to \$165 thousand as of December 31, 2021. During 2020, IDB Invest evaluated loan modifications with a total outstanding balance of \$65.7 million and the relief provided included short-term deferrals of principal amounting to \$5.2 million as of December 31, 2020. IDB Invest determined that these modifications were not considered TDRs based on the guidance set forth in the Interagency Statement. The loans continue to accrue interest during the deferral period and are not reported as past due nor in nonaccrual status. IDB Invest continues to estimate the allowance for credit losses for these loans through the collective assessment under the CECL methodology.

Notes to Financial Statements

Changes in the allowance for credit losses by portfolio segment are presented below (US\$ thousands):

Notes to Financial Statements

A description of credit quality indicators is presented in the table below:

Rating categories	Credit quality indicator	Internal credit risk classification range	Description
aa- and better	Very strong	aa- or higher	An obligor in these categories has a very strong capacity to meet its financial commitment.
a+ to a–	Strong	a+, a, a-	An obligor in these categories has a strong capacity to meet its financial commitment.
bbb+ to bbb-	Adequate	bbb+, bbb, bbb-	An obligor in these categories exhibits an adequate financial profile. However, adverse economic conditions or changing circumstances are more likely to lead to a weakening of the obligor's capacity to meet its financial obligations.
bb+ to bb-	Moderate	bb+, bb, bb-	An obligor in these categories can face major uncertainties or exposures to adverse business, financial, or economic conditions that could lead to its inadequate capacity to meet its financial obligations.
b+ to b-	Weak	b+, b, b-	An obligor in these categories is more vulnerable to nonpayment than obligations rated bb-, but the obligor currently has the capacity to meet its financial obligations. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial obligations.
ccc+ and lower	Very weak	ccc+ or lower	An obligor in these categories faces significant challenges, and default may also already be a virtual certainty. The obligor is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial obligations. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial obligations.

Guarantees

Guarantees issued by IDB Invest have maturities consistent with those of the guaranteed loan portfolio. No guarantees issued by IDB Invest have been called since the inception of the guarantee program.

Notes to Financial Statements

The outstanding exposure for guarantees by IDB Invest was \$134.6 million as of December 31, 2021 (\$107.3 million as of December 31, 2020). The maximum potential amount of future payments under the guarantees, without taking into consideration possible recoveries under recourse provisions or from collateral held or pledged, amounted to \$146.7 million as of December 31, 2021 (\$156.8 million as of December 31, 2020).

The contingent liabilities associated with the guarantees issued by IDB Invest are measured either under the CECL methodology or at fair value through income. For guarantees measured under the CECL methodology, IDB Invest recorded a contingent liability for off-balance sheet credit exposures of \$41 thousand as of December 31, 2021 (\$17.5 million as of December 31, 2020) in the balance sheets and a release of provision for credit losses of \$17.4 million for the year ended December 31, 2021 (provision for credit losses of \$5.0 million for the year ended December 31, 2020) in the income statements. In connection with guarantees measured at fair value, IDB Invest recorded a reduction in the contingent liability of \$1.2 million as of December 31, 2021 in the balance sheets and recognized \$1.2 million net unrealized gains for the year ended December 31, 2021 in the income statements.

Loan participations

As of December 31, 2021, IDB Invest serviced loan participations outstanding of \$2.2 billion (\$1.4 billion as of December 31, 2020) and recognized servicing fees of \$1.2 million for the year ended December 31, 2021 (\$751 thousand for the year ended December 31, 2020) included in Mobilization fees and other income in the income statements.

Variable interest entities

IDB Invest is the primary beneficiary of one VIE as of December 31, 2021. IDB Invest's involvement with this VIE is limited to a loan which amounted to \$7.0 million as of December 31, 2021 (\$6.4 million as of December 31, 2020) and recorded as Development related investments in the balance sheets. Based on the most recent available data, total VIE assets amounted to \$6.7 million as of December 31, 2021 (\$6.4 million as of December 31, 2020), which is considered insignificant compared to the carrying value, and thus not consolidated with IDB Invest's financial statements.

IDB Invest also holds variable interests in the form of development related investments in VIEs in which it is not the primary beneficiary as of December 31, 2021. These VIEs are mainly special purpose vehicles or investment funds, where the sponsor, the general partner or fund manager does not have substantive equity at risk or the equity investors, as a group, lack substantive voting rights or the power, through voting or similar rights, to direct the activities of the entity that most significantly impact the entity's economic performance. IDB Invest's interests in these VIEs are recorded as Development related investments in the balance sheets.

IDB Invest's maximum exposure to loss as a result of its involvement in such VIEs as of December 31, 2021 is as follows (US\$ thousands):

	Decer	December 31, 2021				
Carrying value	\$	162,336				
Undisbursed commitments		103,457				
Maximum exposure to VIEs	\$	265,793				

Notes to Financial Statements

Notes to Financial Statements

7. Derivative Instruments

IDB Invest enters into contracts for derivative instruments primarily for market risk management purposes in connection with its principal business activities. None of these derivative instruments are designated as hedging instruments under ASC 815, *Derivatives*.

The location presented as assets/(liabilities) in the balance sheets and the fair value of derivative instruments by purpose and type are summarized below (US\$ thousands):

		December 31, 2021 December						ecember 31, 2020				
Derivative purpose	Derivative type	_	erivative assets		Derivative liabilities	C	Derivative assets	_	erivative iabilities			
Development related debt investments	Cross currency swaps	\$	5,302	\$	(1,311)	\$	266	\$	(444)			
	Interest rate swaps		11,106		(2,849)		164		(90)

Total		\$	17,689	\$	(79,941)	\$	5,461	\$	(1,834)			

The effect of derivative instruments in the income statements are summarized below (US\$ thousands):

		Ye	ear ended D	ecen	cember 31		
Derivative type and purpose	Income statement location		2021		2020		
Development related debt investments							
Cross currency swaps	Gain/(loss) from changes in fair value on non-trading portfolios and foreign exchange transactions, net	\$	3,446	\$	(178)		
Interest rate swaps	Gain/(loss) from changes in fair value on non-trading portfolios and foreign exchange transactions, net		8,818		62		
Borrowings							
Cross currency swaps	Gain/(loss) from changes in fair value on non-trading portfolios and foreign exchange transactions, net		(40,269)		3,848		
Interest rate swaps	Gain/(loss) from changes in fair value on non-trading portfolios and foreign exchange transactions, net		(31,084)		2,073		
Total		\$	(59,089)	\$	5,805		

The income related to each derivative type includes realized and unrealized gains and losses.

As of December 31, 2021, the outstanding volume, measured by notional amount, of swap contracts was \$4.6 billion (\$2.4 billion as of December 31, 2020).

Notes to Financial Statements

IDB Invest does not present derivative assets and liabilities related to contracts entered into with the same counterparty under a legally enforceable netting agreement on a net basis in the balance sheets. The following tables provide the gross and net positions of IDB Invest's derivative contracts considering amounts and collateral held or pledged in accordance with enforceable counterparty credit support and netting agreements described below (US\$ thousands):

				Decembe	r 31, 2021

⁽¹⁾ Collateral received of \$2.2 million reflects the offsetting threshold limit, which cannot exceed the fair value of the derivative assets. Total cash collateral received was \$2.6 million as of December 31, 2020. Refer to Note 8 for additional details related to Payables for cash collateral received.

IDB Invest's derivative contracts with market counterparties are entered into under standardized master agreements published by the International Swaps and Derivatives Association ("ISDA" Agreements). ISDA Agreements provide for a single lump sum settlement amount upon the early termination of transactions following a default or termination event whereby amounts payable by the non-defaulting party to the other party may be applied to reduce any amounts that the other party owes the non-defaulting party. This setoff effectively reduces any amount payable by the non-defaulting party.

IDB Invest's ISDA Agreements are appended by a Credit Support Annex ("CSA") that provides for the receipt and posting of collateral in the form of cash in US\$ or U.S. Treasury securities to reduce mark-to-market exposure among derivative market counterparties. IDB Invest recognizes cash collateral received and a corresponding liability in its balance sheets for the obligation to return it. As of December 31, 2021, IDB Invest had \$5.7 million of outstanding obligations to return cash collateral under CSAs (\$2.6 million as of December 31, 2020). IDB Invest recognizes a receivable in its balance sheets for its rights to cash collateral posted. As of December 31, 2021, \$65.8 million of cash collateral was posted under CSAs (none as of December 31, 2020). No securities collateral was received nor pledged as of December 31, 2021 nor 2020. Securities received as

Notes to Financial Statements

collateral are not recognized in the balance sheets. In accordance with the CSAs, IDB Invest may rehypothecate securities received as collateral, subject to the obligation to return such collateral and any related distributions received. In the event of a counterparty default, IDB Invest may exercise certain rights and remedies, including the right to setoff any amounts payable by the counterparty against any collateral held by IDB Invest and the right to liquidate any collateral held.

8. Payables and Other Liabilities

Payables and other liabilities are summarized below (US\$ thousands):

Deferred revenue includes service fees collected from related parties. Additional information about IDB Invest's related party transactions is included in Note 13.

Notes to Financial Statements

9. Capital

IDB Invest's original authorized share capital was increased to \$705.9 million, equivalent to 70,590 shares, through a \$500.0 million general capital increase approved in 1999 (GCI-I), and several special increases. These increases allocated a total of \$505.9 million for subscriptions by new and existing member countries, with a par value and issuance price of \$10,000 per share.

On March 30, 2015, IDB Invest's Board of Governors authorized the Second General Capital Increase (GCI-II) for \$2.03 billion. The capital increase is comprised of: (i) \$1.305 billion in capital to be paid by IDB Invest shareholders during the 2016-2022 period; and (ii) annual transfers from the IDB, on behalf of its shareholders, to be paid to IDB Invest during the period 2018-2025, totaling \$725.0 million for the entire period, and conditional upon annual approval by the IDB Board of Governors. The GCI–II increases the authorized capital stock by 125,474 shares – 80,662 shares corresponding to capital contributions payable by the countries (Annex A Shares) and 44,812 shares corresponding to transfers from the IDB on behalf of its member countries (Annex B Shares) – with a share issuance price of \$16,178.60 per share. With this capital increase, total authorized shares amount to 196,064.

All Annex A Shares have been subscribed and are expected to be paid in over time. In the balance sheets, subscribed shares are recorded as Capital, par value, Additional paid-in capital and Receivable from members on the date of the subscription instrument at the share issuance price. Payments are due on October 31 of each year from 2016 to 2022, per a payment plan determined and communicated by management to each subscribing country. The Board of Executive Directors is authorized to extend payment deadlines. The price for Annex A Shares not paid within their corresponding annual installment is adjusted to reflect a 5.0% increase for each year of arrears; except for shares corresponding to the first installment which were fully paid in by the end of the second installment and not subject to a price adjustment. The price adjustment for shares in arrears is recorded to Additional paid-in capital and to Receivable from members in the balance sheets.

Capital contributions of \$62.7 million were received during the year ended December 31, 2021 for a total of \$1.2 billion in contributions corresponding to Annex A Shares under GCI-II. In March 2021, the Board of Governors approved income distributions corresponding to Annex B Shares transfers from the IDB on behalf of its shareholders that are also member countries of IDB Invest. Following this approval, IDB Invest received \$148.6 million in income distributions (transfers) for a total of \$356.5 million contributions corresponding to Annex B Shares under GCI-II, which are included as part of Total paid-in capital in the balance sheets. Total capital contributions of \$1.5 billion have been received under GCI-II through December 31, 2021.

Under the Agreement Establishing the Inter-American Investment Corporation, any member may withdraw from IDB Invest, which shall become effective on the date specified in the notice but in no event prior to six months from the delivery date of such notice. Even after withdrawing, a member shall remain liable for all obligations to IDB Invest to which it was subject on the date of delivery of the withdrawal notice. In the event a member withdraws, IDB Invest and the member may agree to the repurchase of the shares of said member on terms appropriate under the circumstances. If such agreement is not reached within three months of the withdrawal notice, or within a term agreed upon between both parties, the repurchase price of the member's shares shall be equal to the book value on the date when the member ceases to belong to IDB Invest, such book value to be determined by the audited financial statements. Payment for shares shall be made in such installments, times, and currencies as IDB Invest shall determine, taking into account its financial position.

(1) Includes Annex B shares for which income distributions (transfers) were made by IDB on behalf of its shareholders.
 (2) Includes the amount in addition to par value for shares under GCI-II, partial payments in excess of full shares.
 (3) Represents receivable from members under GCI-II.
 (4) Data are rounded; detail may not add to total because of rounding.
 (5) Croatia's voting power is 0.0062.
 (6) Slovenia's voting power is 0.0037.

Notes to Financial Statements

10. Fair Value Measurements

IDB Invest carries a portion of its financial instruments at fair value on a recurring basis and discloses fair value of financial instruments not carried at fair value in accordance with US GAAP. The methodologies and key assumptions IDB Invest uses to estimate the fair values of its financial instruments are summarized below.

Projections of future cash flows and other assumptions and methodologies used in the determination of fair value are subjective, particularly when the measurement relies on unobservable market inputs. Minor changes in assumptions or methodologies may affect the fair value measurements. Also, the impact of COVID-19 introduced a heightened degree of uncertainty in these measurements.

Cash and cash equivalents – The carrying amount reported in the balance sheets approximates fair value.

Liquid assets – Fair values for money market funds and debt securities are based on either unadjusted quoted prices for identical assets or liabilities in active markets or quoted prices in active markets for identical assets or liabilities or prices derived from alternative pricing models when these prices are not available from pricing vendors. These methodologies apply to certain investments in non-U.S. government obligations, agencies, supranationals and corporate bonds. Also included are commercial paper (CP) and certificates of deposit (CD) issued under large U.S. based CP or CD programs. For investments for which prices and other relevant information, generated by market transactions involving identical or comparable assets, are not available, the income approach is used, based on yield curves, bond or credit default swap spreads, and recovery rates based on collateral values as key inputs.

Development related debt investments – Loans and development related investments in debt securities for which a combination of observable and unobservable inputs is generally available, require the use of estimates and present value calculations of future cash flows. Fair values are estimated using recently executed transactions, market price quotations (where observable), and market observable credit default swap levels along with proprietary valuation models where such transactions and quotations are unobservable. The lack of objective pricing standards adds a greater degree of subjectivity and volatility to these derived or estimated fair values.

Any excess or deficit resulting from the difference between the carrying amounts of the development related debt investments carried at amortized cost and the fair value disclosed does not necessarily reflect the realizable values since IDB Invest generally holds investments to maturity with the aim of realizing their contractual cash flows.

Equity investments – In most cases, market prices are not available for equity investments, and alternate valuation techniques require a significant degree of judgment. IDB Invest intends to hold investments in LPs until the final liquidation of the underlying assets of the LPs in order to participate fully in the performance of the LP. IDB Invest does not have redemption rights in any of these investments. IDB Invest estimates that the underlying assets of the LPs generally may be liquidated over a period of 10 years.

Equity investments at fair value – Equity investments are carried at fair value on a recurring basis if publicly traded in active markets, or if IDB Invest elects the FVO. For investments in LPs, IDB Invest utilizes the NAVs reported by the fund managers as the basis of the fair value measurement. These NAVs are derived from the fair values of the underlying investments and adjusted further by IDB Invest, as needed.

Equity investments at cost-based measurement alternative – All equity investments are measured at fair value since June 30, 2021. Prior to this, IDB Invest used estimates and present value calculations of future cash flows to calculate impairments of equity investments measured at cost under the cost-based measurement alternative. IDB Invest relied on third-party valuation specialists when available, internal estimates, or a combination of both.

Notes to Financial Statements

Derivative instruments – These include cross currency and interest rate swap contracts. Fair values are determined by obtaining the present value of estimated future cash flows using appropriate discount rates.

Borrowings – IDB Invest's borrowings are recorded at amortized cost or fair value. The fair value of IDB Invest's borrowings is estimated using traded prices, quoted market prices or discounted cash flow analyses based on IDB Invest's current borrowing rates for similar types of borrowing arrangements.

Other assets and liabilities – The carrying value of financial instruments included in Receivables and other assets, and Payables and other liabilities approximates fair value due to their liquid or short-term nature. Payables and other liabilities includes guarantees issued and measured at fair value.

Notes to Financial Statements

Fair value of financial instruments

The following table presents the carrying values and estimated fair values of IDB Invest's financial instrument assets/(liabilities) and their classification within the fair value hierarchy in accordance with ASC 820, *Fair Value Measurement* (US\$ thousands):

	December 31, 2021

Notes to Financial Statements

⁽¹⁾ Includes a combination of valuation techniques utilizing discounted cash flows, recent transactions and valuation multiples.

There were no transfers between levels during the year ended December 31, 2021 nor 2020.

Notes to Financial Statements

11. Non-trading portfolios

IDB Invest's non-trading portfolio includes development related debt investments and borrowings measured at fair value under the FVO as well as the related derivative instruments at fair value. Net gains and losses from changes in fair value on the non-trading portfolios and foreign exchange transactions are as follows (US\$ thousands):

		Year ended D	ecemb	per 31
		2021	:	2020
Changes in fair value				
Development related debt investments	\$	(422)	\$	(937)
Borrowings		69,030		3,997
Derivatives				
Realized gain/(loss) on swaps ⁽¹⁾		6,790		2,178
Unrealized gain/(loss) on swaps ⁽¹⁾		(65,879)		3,627
Gain/(loss) from changes in fair value, net		9,519		8,865
Foreign exchange transactions				
Development related debt investments		(43,020)		(19,551)
Borrowings		46,959		26,176
Other assets/liabilities		936		(138)
Gain/(loss) from foreign exchange transactions, net		4,875		6,487
Gain/(loss) from changes in fair value and foreign exchange transact	ions, net \$	14,394	\$	15,352

⁽¹⁾ Includes foreign exchange gain/(loss) on cross currency swaps.

Changes in the fair value of borrowings resulting from changes in IDB Invest's own credit risk spread are recorded through Other comprehensive income whereas changes in fair value due to market risk, and all fair value changes on derivatives, are reported in the income statements.

Notes to Financial Statements

12. Contingencies and Leases

In the ordinary course of business, IDB Invest is from time to time named as a defendant, codefendant or party in litigation matters inherent to and typical of the operations in which it is engaged. In the opinion of IDB Invest's management, the ultimate resolution of these legal proceedings would not have a material adverse effect on IDB Invest's financial position, results of operations, or cash flows.

The global outbreak of the COVID-19 pandemic has disrupted economic markets and created significant volatility. The operational and financial performance of the companies IDB Invest finances depends on future developments, including the duration and spread of the outbreak. Such uncertainty may impact the fair value of IDB Invest's development related investments and the credit worthiness of IDB Invest's borrowers. IDB Invest has capital buffers in place to absorb additional stress and credit rating downgrades.

Office Space Leases

IDB Invest has entered into office space leases with the IDB at its headquarters and in its Regional Developing Member Countries that are accounted for as either short-term leases or operating leases. The current lease agreement with the IDB at headquarters expires in 2030. The remaining current lease agreements with the IDB in the Regional Developing Member Countries are generally renewed annually. The lease agreements in Argentina, Colombia and Panama include renewal options which extend the lease term between 2022 and 2029, all of which IDB Invest is reasonably certain to exercise for the duration established in the contract.

Refer to Notes 5 and 8 for additional information related to IDB Invest's operating lease right-of-use assets and operating lease liabilities outstanding as of December 31, 2021 and 2020.

The following table details the lease expenses and quantitative disclosure requirements (US\$ thousands):

	 Year ended	Decembe	r 31
	2021		2020
Operating leases		_	
Operating lease expense	\$ 5,239	\$	6,110
Total lease expense	\$ 5,239	\$	6,110
Supplemental disclosure:			
Weighted average of lease terms (years)	8.9		9.9
Weighted average discount rate	1.8 %)	3.1 %

Discount rate is determined as IDB Invest's incremental borrowing rate under the IDB multi-currency facility.

Maturity analysis of operating lease liabilities with the IDB are as follows (US\$ thousands):

	Decem	nber 31, 2021
Undiscounted cash flows in 2022		5,093
Undiscounted cash flows in 2023		5,066
Undiscounted cash flows in 2024		4,976
Undiscounted cash flows in 2025		4,981
Undiscounted cash flows in 2026 - 2030		24,775
Total operating leases	\$	44,891
Discount		(3,298)
Operating lease liability	\$	41,593

Notes to Financial Statements

13. Related Party Transactions

IDB Invest provides certain services to the IDB and the IDB provides certain services to IDB Invest pursuant to SLAs, which outline the duration, scope of work, roles and responsibilities, remuneration, and performance metrics of each institution. The services performed under the SLAs are further described below. IDB Invest has also entered into office space leases with the IDB as described in Note 12. IDB Invest also has related party relationships with trust funds it administers or IDB administers as described below.

Non-Sovereign Guaranteed Operations

Following the IDB Group private sector and non-sovereign guaranteed (NSG) reorganization, all new NSG activities are originated by IDB Invest and largely co-financed by IDB Invest and the IDB. In co-financing arrangements, IDB Invest and the IDB have separate legal and economic interests in a financing transaction, which may be subject to certain minimum amounts as agreed between IDB Invest and the IDB.

IDB Invest earns revenue from an annual renewable SLA under which IDB Invest provides loan origination, credit risk evaluation and monitoring, and certain loan administration services for the IDB related to its private sector operations including operations that are co-financed by IDB Invest and IDB. IDB Invest also provides certain advisory services to the IDB Group. These amounts are included in Service fees from related parties in the income statements.

Management of External Funds

IDB Invest administers on behalf of other related party entities, which include donors and member countries, funds restricted for specific uses that include the co-financing of certain projects, technical studies for borrowers, project-related studies, and research and training programs. These funds are held in trust by IDB Invest and are not commingled with IDB Invest's funds, nor are they included in the assets of IDB Invest. IDB Invest receives a management fee that is generally a percentage of the funds received. These fees are included in Service fees from related parties in the income statements.

Access to IDB Administered Funds

In addition to the aforementioned funds, IDB Invest provides certain services for trust funds administered by the IDB on behalf of the trust fund donors (the Trust Funds). IDB Invest receives an allocation of the IDB's related Trust Fund fees. Such fees are intended to cover internal and external costs associated with administering the NSG activities for the Trust Funds and related operations over the expected lives of the Trust Funds and the underlying operations. Costs expected to be incurred approximate the allocable fee. The Trust Fund organizational documents provide for either the payment of a lump sum or scheduled payments. The timing of the payments may not correspond to the incurrence of the related costs. IDB Invest also provides certain technical assistance activities for private sector operations on behalf of donor trust funds that are directly funded by IDB Trust Funds. These arrangements are recognized on a cost reimbursement basis and presented gross in Service fees from related parties and Administrative expenses in the income statements.

For the year ended December 31, 2021, IDB Invest received \$3.5 million for these services (\$4.3 million for the year ended December 31, 2020). As of December 31, 2021, IDB Invest has recorded deferred revenue of \$16.0 million related to these services (\$15.0 million as of December 31, 2020), which will be recognized as revenue as services are provided. Deferred revenue is presented as a component of Payables and other liabilities in the balance sheets.

Notes to Financial Statements

Revenue from related party transactions are as follows (US\$ thousands):

	 Year ended	Decem	nber 31
	2021		2020
SLA revenue	\$ 68,805	\$	76,688
Management of external funds revenue	2,334		2,109
IDB administered funds revenue	7,803		7,079
Total	\$ 78,942	\$	85,876

SLA Expenses

IDB Invest purchases various general and administrative services from the IDB under a series of annual renewable SLAs. For the year ended December 31, 2021, IDB Invest incurred expenses of \$16.0 million SLA services provided by the IDB (\$16.7 million for the year ended December 31, 2020), which are included in Administrative expenses in the income statements. Payables related to these SLA expenses are included in the total Due to IDB, net of \$16.6 million as of December 31, 2021 (\$14.8 million as of December 31, 2020). Refer to Note 8 for additional details.

Other Transactions with Related Parties

IDB Invest has a multi-currency credit facility with the IDB up to \$300.0 million at the rate in accordance with the IDB's lending rate policy. The tenor of borrowings under this facility shall not exceed twenty years from the disbursement date. This facility permits IDB Invest to supplement resources in local currencies to support its development related investment portfolio through December 31, 2029. As of December 31, 2021, IDB Invest's total drawdowns from the IDB multi-currency credit facility were \$206.9 million and \$93.1 million remain undrawn (\$185.1 million total drawdowns and \$114.9 million undrawn as of December 31, 2020). Refer to Note 6 for additional details.

14. Pension and Postretirement Benefit Plans

Both the IDB and IDB Invest are sponsors of the Pension Plans and PRBP and each employer presents its respective share of these plans using a December 31 measurement date.

Notes to Financial Statements

Obligations and funded status

IDB Invest uses a December 31 measurement date for the Pension Plans and the PRBP. The following table summarizes IDB Invest's change in projected benefit obligation, change in plan assets, funded status of the Pension Plans and the PRBP, and the assets/(liabilities) recognized in the balance sheets (US\$ thousands):

		Pension Plans				PRBP

⁽¹⁾ Includes both annual transfers between IDB and IDB Invest and the one-time liability shift from IDB Invest to IDB for LRP participants.

As of December 31, 2021 and 2020, the Pension Plans and PRBP were all underfunded. In 2021 and 2020, the aggregate fair value of the Pension Plans and PRBP's assets were \$488.4 million and \$442.2 million, respectively, and aggregate projected benefit obligations were \$633.0 million and \$600.0 million, respectively, contributing to the total Pension Plans and PRBP liability of \$144.6 million and \$157.8 million, respectively, as of December 31, 2021 and 2020.

Notes to Financial Statements

The accumulated benefit obligation, which excludes the effect of future salary increases, in excess of the fair value of the Pension Plans' assets is as follows as of December 31, 2021 (US\$ thousands):

	 Pension Plans	6
	2021	2020
Accumulated benefit obligation	\$ (350,266)	(312,419)
Fair value of plan assets	\$ 300,352 \$	259,378
Funded/(Underfunded) status	\$ (49,914) \$	(53,041)

Components of net periodic benefit cost

Pension Plans and PRBP net periodic benefit costs recognized in the income statements consist of the following components (US\$ thousands):

	 Year ended December 31						
	Pension Plans				PR		
	2021		2020		2021		2020
Service cost ⁽¹⁾	\$ 25,224	\$	18,717	\$	10,567	\$	7,671
Interest cost ⁽³⁾	9,340		9,635		5,385		5,600
Expected return on plan assets ⁽²⁾⁽³⁾ Amortization of: ⁽³⁾	(10,709)		(11,590)		(7,494)		(7,781)
Net actuarial (gain)/loss	7,006		4,191		3,788		2,414
Prior service (credit)/cost			_		(437)		(437)
Net periodic benefit cost	\$ 30,861	\$	20,953	\$	11,809	\$	7,467

⁽¹⁾ Included in Administrative expenses.

⁽²⁾ The expected long-term rate of return on plan assets is 4.75% in 2021 and 5.75% in 2020.

⁽³⁾ Included in Other components of pension benefit costs, net.

Other changes in the Pension Plans and PRBP assets and projected benefit obligations recognized in Other comprehensive income/(loss) consist of the following components (US\$ thousands):

	Year ended December 31							
	Pension Plans				PR			
		2021		2020		2021		2020
Current actuarial (gain)/loss, net	\$	(12,551)	\$	35,924	\$	(19,933)	\$	16,422

Total recognized in Net periodic benefit cost and Other comprehensive (income)/loss	\$	11,304	\$	52,686	\$	(11,475)	\$	21,912

Notes to Financial Statements

Actuarial assumptions

The actuarial assumptions used in the Pension Plans and PRBP valuations are based on financial market interest rates, past experience, and management's best estimate of future benefit changes and economic conditions. Changes in these assumptions will impact future benefit costs and obligations. Actuarial gains and losses occur when actual results are different from expected results. Actuarial gains and losses recognized in Accumulated other comprehensive income/(loss), which exceed 10% of the greater of the benefit obligation or market-related value of the plan assets at the beginning of the period, are amortized to income over the average remaining service period of active participants expected to receive benefits under the Pension Plans and PRBP, which is approximately 10.6 years and 12.5 years, respectively.

Unrecognized prior service credit is amortized over a range of 1.4 years to 4.0 years for the PRBP.

The weighted-average assumptions used to determine the benefit obligation and the net periodic benefit cost were as follows:

	Pension	Plans	PRB	P	
	2021	2020	2021	2020	
Weighted average assumptions used to determine benefit obligation as of December 31					
Discount rate	2.78 %	2.44 %	2.83 %	2.52 %	
Inflation rate	2.55 %	2.12 %	2.55 %	2.12 %	
Rate of compensation increase	4.59 %	4.26 %	n/a	n/a	
	Pension	Plans	PRB	P	
	2021	2020	2021	2020	
Weighted average assumptions used to determine net periodic benefit cost for years ended December 31					
Discount rate	2.44 %	3.17 %	2.52 %	3.23 %	
Expected long-term rate of return on plan assets	4.75 %	5.75 %	4.75 %	5.50 %	
Rate of compensation increase	4.26 %	4.34 %	n/a	n/a	
Inflation rate	2.12 %	2.20 %	2.12 %	2.20 %	

The expected long-term rate of return on the Pension Plans and PRBP's assets represents management's best estimate, after surveying external investment specialists, of the expected long-term (10 years or more) forward-looking rates of return of the asset categories employed by the Pension Plans and PRBP, weighted by the Pension Plans and PRBP's investment policy asset allocations. Accumulated and projected benefit obligations are measured as the present value of expected payments. The discount rate used is selected in reference to the year-end yield of AA corporate bonds within the approved Financial Times Stock Exchange Pension Liability Index, with maturities that correspond to the payment of benefits. For the assumed rate of U.S inflation, the IDB and IDB Invest have established a process by which a range of inputs is reviewed, including 10-year forward looking expert opinion forecasts, the average of the 10 year and 30 year U.S. Treasury Inflation Protected Securities (U.S. TIPS) breakeven inflation rate, and historical averages for U.S Consumer Price Index (CPI).

Significant actuarial gains related to changes in the Pension Plans' and PRBP benefit obligations for the year ended December 31, 2021 primarily resulted from changes in the discount rates (actuarial losses for the year ended December 31, 2020).

Notes to Financial Statements

For participants assumed to retire in the United States, the accumulated postretirement benefit obligation was determined using the following health care cost trend rates as of December 31:

	PRBI	2
	2021	2020
Health care cost trend rates assumed for next year		
Medical, Non-Medicare	4.50 %	4.50 %
Medical, Medicare	3.00 %	2.50 %
Prescription drugs	6.00 %	6.00 %
Dental	4.50 %	4.50 %
Rate to which the cost trend rate is assumed to decline (the ultimate trend rate)		
Medical, Non-Medicare	4.50 %	4.50 %
Medical, Medicare	3.00 %	2.50 %
Prescription drugs	6.00 %	6.00 %
Dental	4.50 %	4.50 %
Year that the rate reaches the ultimate trend rate	2022	2021

For those participants assumed to retire outside of the United States, a 5.00% health care cost trend rate was used for 2021 and 2020, with an ultimate trend rate of 4.50% in 2024.

Pension Plans and PRBP Assets

The assets of the Pension Plans and the PRBP are managed primarily by external investment managers engaged by the IDB who are provided with governing Committee-approved investment guidelines that take into account the Pension Plans and PRBP investment policies. Investment policies with long-term strategic asset allocations have been developed so that there is an expectation of sufficient returns to meet long-term funding needs. The policies allocate 60% to 65% of the Pension Plans portfolio to growth-oriented, inflation-hedging assets (the Return Strategies), and 35% to 40% of assets to nominal and inflation-indexed U.S. fixed income which partially hedge the interest rate of the Pension Plans and PRBP's liabilities, and to protect against disinflation (the Liabilities Strategies).

The Pension and Managing Committees approve Investment Policy Statements (IPS) and Strategic Asset Allocations (SAA) of the Pension Plan's and PRBP, consistent with the IDB's Risk Appetite (RA) and Long-term Funding (LTF) policies and adopted by IDB Invest.

Notes to Financial Statements

The IPS SAA target allocations as of December 31, 2021, are as follows:

	Pension Plans	PRBP
U.S. equities	20 %	20 %
Non-U.S. equities	18 %	18 %
Emerging markets equities	4 %	4 %
Public real estate	3 %	3 %
Long duration diversified fixed income	27 %	27 %
Core fixed income	4 %	4 %
High yield fixed income	2 %	2 %
U.S. inflation-indexed fixed income	4 %	4 %
Emerging markets fixed income	3 %	3 %
Private real estate	5 %	5 %
Public Infrastructure	3 %	3 %
Private Infrastructure	2 %	2 %
Tactical Asset Allocation	5 %	5 %
Commodity index futures	0 %	0 %
Short-term fixed income funds	0 %	0 %
Stabilization Reserve Fund:		
Core fixed income	50 %	50 %
U.S. inflation-indexed fixed income	0 %	0 %
Short-term fixed income funds	50 %	50 %

Investment and asset class risk is managed by the continuous monitoring of each asset class and investment manager. Investments are generally rebalanced monthly within IPS targets ranges using cash flows and other transactions. Investment managers are generally not allowed to invest more than 5% of their respective portfolios in the securities of a single issuer other than the U.S. Government. The use of derivatives by an investment manager for the Pension Plans and PRBP is limited, and subject to specific approval by the Managing Committees of the Pension Plans and PRBP.

The assets classes in which the Pension Plans (SRP and CSRP) and PRBP, invest are described below:

- U.S. equities For the Pension Plans and PRBP, commingled funds that invest, long-only, in U.S. common stocks. Management of the funds replicates or optimizes the all capitalization (cap) Russell 3000 Index. For the SRP and PRBP only, approximately 50% of U.S. equities assets are actively managed in separate accounts holding individual stocks.
- Non-U.S. equities For the Pension Plans and PRBP, commingled funds that invest, long-only, in non-U.S. common stocks. Management of the funds replicates or optimizes the large/mid-cap MSCI WORLD EX-USA IMI Index and/or the large/mid-cap MSCI EAFE Index. For the SRP and PRBP only, approximately 60% of non-U.S. equities assets are actively-managed in separate accounts holding individual stocks.
- Emerging markets equities For the Pension Plans and PRBP, actively managed commingled funds and/or mutual fund that invest, long-only, in emerging markets common stocks. Managements of the funds select securities, based upon fundamental characteristics, which are generally comprised within the large/mid-cap MSCI Emerging Markets Free Index.

Notes to Financial Statements

- Public real estate equities For the SRP and PRBP only, separate accounts which holds, long-only, real
 estate securities. The account is actively-managed based upon fundamental characteristics, investing in
 securities generally comprised within the MSCI U.S. REIT Index.
- Long duration diversified fixed income For the SRP and PRBP only, long duration fixed income assets are actively managed in separate accounts holding individual bonds generally comprised within the Bloomberg Barclays U.S. Long Government/Credit Bond Index. For the CSRP, actively managed commingled fund and/or mutual fund that invest, long-only, in long duration government and credit securities. Managements of the funds select securities, based upon fundamental characteristics, which are generally comprised within the Bloomberg Barclays U.S. Long Government/Credit Bond Index, as well as opportunistic investments in non-index securities.
- Core fixed income For the Pension Plans and PRBP, actively managed commingled funds that invest, long-only, in intermediate duration government and credit securities. Managements of the funds select securities, based upon fundamental characteristics, which are generally comprised within the Bloomberg Barclays U.S. Aggregate Bond Index, as well as opportunistic investments in non-index securities.
- High yield fixed income For the SRP only, assets are actively managed in a separate account holding individual securities, and for the PRBP only, in an actively managed commingled fund. For both the SRP and PRBP, the investible universe is generally comprised of the securities within the Bloomberg Barclays High Yield 2% Constrained Index, as well as opportunistic investments in non-index securities. High yield securities are financial obligations of U.S. companies, rated below investment-grade by at least one of the nationally recognized statistical rating organizations.
- U.S. inflation-indexed fixed income For the Pension Plans and PRBP, investment in individual U.S. Treasury Inflation Protected Securities in accounts managed internally. For the SRP, CSRP and PRBP, replicate or optimize the Bloomberg Barclays U.S. Treasury Inflation Notes 10+ Years Index. For the SRP and PRBP Stabilization Reserve Funds, replicate or optimize the Bloomberg Barclays U.S. Treasury Inflation TIPS 0-5 Years Index.
- Emerging markets fixed income For the Pension Plans and PRBP, actively managed commingled funds that invest, long-only, in emerging markets fixed income. The funds invest in sovereign and subsovereign United States dollar- and local-denominated debt. Managements of the funds invest in securities generally comprised within the J.P. Morgan EMBI Global Diversified Index, as well as opportunistic investments in non-index securities.
- Private real estate For the Pension Plans and PRBP, an open-end commingled funds which invest, long-only, in U.S. real estate properties. The funds are actively-managed based upon fundamental characteristics of the properties.
- Public infrastructure For the CSRP, an enhanced index exchange-traded fund that invests, long-only, in U.S. and developed markets common stocks within the infrastructure industries. Management of the fund selects securities, based upon fundamental characteristics, which are generally comprised within the MSCI World Infrastructure Index. For the SRP and PRBP only, assets are actively managed in a separate account holding individual stocks traded in the U.S. and non - U.S. developed markets.
- Private infrastructure For the SRP and PRBP only, an actively managed, open-end commingled fund which invests, long-only, in U.S. and developed non U.S. markets private equity within the infrastructure sector.
- Tactical asset allocation For the SRP and PRBP only, actively managed commingled funds and mutual fund that invest in U.S. and developed markets equities, fixed income, commodities and currencies, investments could shift due to opportunistic behavior within these markets.

Notes to Financial Statements

 Short-term fixed income funds - Commingled funds that invest, long-only, in U.S. Government securities with maturities of less than 18 months. Managements of the funds invest in short-term government securities only, which are benchmarked against the Merrill Lynch 3-month Treasury Bill Index.

Effective December 2015, the IDB Board of Executive Directors (Board) approved and IDB Invest adopted the Long-Term Funding Policy (LTF) for the Pension Plans (SRP and CSRP) and the PRBP that established stable contribution rates of 20% (SRP), 0.71% (CSRP) and 12% (PRBP) of applicable salaries and established the Stabilization Reserve Funds (SRFs) for the SRP and PRBP for IDB Invest and the IDB. The LTF Policy had a five-year initial term. In July 2019, following a review of the LTF Policy components, the Boards of IDB Invest and the IDB adopted an enhanced version of the LTF policy as part of the ongoing financial policies of the IDB. The enhanced version of the LTF policy removes its sunset period, continues to keep the IDB Invest and IDB contribution rates at a stable level, and establishes a rules based mechanism to guide management decision making to allocate IDB Invest and IDB contributions when the SR Funds reaches its limits, as well as when the Pension Plans and PRBP reach their fully funded status. IDB Invest contributions made in excess (deficit) of the actuary's determined contribution rate are allocated (withdrawn) to (from) the SR Funds. The approved IPS SAA for the SR Funds is 50% Short-term fixed income funds and 50% Core fixed income and, for the SRP and PRBP only, a permitted 0% to 10% opportunistic investment in U.S. TIPS.

The following tables set forth the investments of the Pension Plans and PRBP as of December 31, 2021 and 2020, which are measured at fair value and presented together with their weighted average allocation, by level within the fair value hierarchy (in thousands). As required by the fair value measurements accounting framework, these investments are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. Investments in funds that do not have a readily determinable fair value are measured at NAV as a practical expedient and are not classified within the fair value hierarchy (US\$ thousands).

Total				\$	182,791	

⁽¹⁾ Includes receivables and payables carried at amounts that approximate fair value. Mainly payables for investments purchased.

Investment securities that are measured at fair value based on quoted market prices in active markets, a valuation technique consistent with the market approach, include U.S., non-U.S. infrastructure individual equity holdings, public infrastructure exchange trade funds, fixed income, emerging markets equity and tactical asset allocation mutual funds, U.S. treasury and U.S. inflation-indexed fixed income securities. Such securities are classified within Level 1 of the fair value hierarchy.

Investment securities that are measured at fair value based on quoted market prices for similar assets in active markets, or quoted prices for identical or similar assets in markets that are not active, a valuation technique consistent with the market approach, include corporate, non-U.S. government, high yield and municipal fixed income, and commercial mortgage backed securities. Also included are proprietary investment managers' commingled funds investing in U.S. and global equities, emerging markets fixed income, core and long-duration fixed income funds, and/or short-term fixed income investments. These commingled funds are not publicly traded and are measured at fair value based on the net asset per share, which are determined and published and are the basis for current transactions. Such securities are classified within Level 2 of the fair value hierarchy.

Notes to Financial Statements

Proprietary investment managers' funds investing in private real estate and tactical asset allocation do not have readily determinable fair values and are measured at the NAV as a practical expedient. Such investments are not classified within the fair value hierarchy.

Contributions

Contributions from IDB Invest to the Pension Plans and the PRBP during 2022 are expected to be approximately \$8.7 million and \$5.8 million, respectively. All contributions are made in cash.

Estimated future benefit payments

The following table summarizes the benefit payments, which reflect expected future service, as appropriate, expected to be paid in each of the next five years and in the aggregate for the subsequent five years. These amounts are based on the same assumptions used to measure the benefit obligation as of December 31, 2021 (US\$ thousands).

	Pens	ion Plans	PRBP
Estimated future benefit payments			
2022	\$	5,303 \$	1,482
2023		5,842	1,635
2024		6,444	1,802
2025		7,047	2,028
2026		7,806	2,268
2027-2031		53,036	17,071

15. Subsequent Events

Management has evaluated subsequent events through March 1, 2022, which is the date the financial statements were issued. Management determined that there were no subsequent events that require disclosure under ASC Topic 855, *Subsequent Events*.
