## 1. INTRODUCTION

Paracel is a Paraguayan company, with capital from national and international financial institutions, which was created with the purpose of developing a unique project in the country: to build and operate a world-class eucalyptus pulp mill, the largest private enterprise in the history of Paraguay.

With the purpose of creating better ways of coexistence between the needs of human beings and the planet, Paracel S.A. is dedicated to eucalyptus forestry and pulp production, operating its mill with the highest international standards of occupational health and safety, environmental, social and economic sustainability.

The venture will use the best available resources in terms of technologies (BAT - Best Available Techniques) and environmental management (BPEM - Best Practices of Environmental Management).

The construction phase of the industrial plant is scheduled to begin in 2021, and its operation is expected to start in the last quarter of 2023. In its operational phase it will be supplied with eucalyptus wood from sustainable forestry plantations certified by the Forest Stewardship Council (FSC) and other global sustainability standards.

The company currently owns more than 180,000 ha of land, mostly located in the department of Concepción, approximately 130 km from the industrial site.

During the first six years, timber will be supplied from Brazil, Argentina, and forestations located in the country, which will be transported by land and river to "Puerto Paracel". It is worth mentioning that the mobilization of trucks with logs from the company's own plantations is expected to begin in the fourth year of the project.

It is estimated that both components (industrial and forestry), in the different stages of the project, could generate around 40,000 direct and indirect jobs.

Therefore, establishing the regulatory framework that directs the form and frequency of PARACEL S.A.'s relationship with its different social actors (internal and external) is essential for the construction of effective action strategies with each one of them. To this end, this document includes the company's strategies and programs for this purpose, in all its components: forestry, industrial and logistics.

	<b>PLAN FOR RELATIONS WITH THE COMMUNITY AND OTHER SOCIAL ACTORS</b>	CODE: PL/SS/ASO
		DATE: 06/08/2021
		VERSION: 00
		PAGE: 3 OF 78

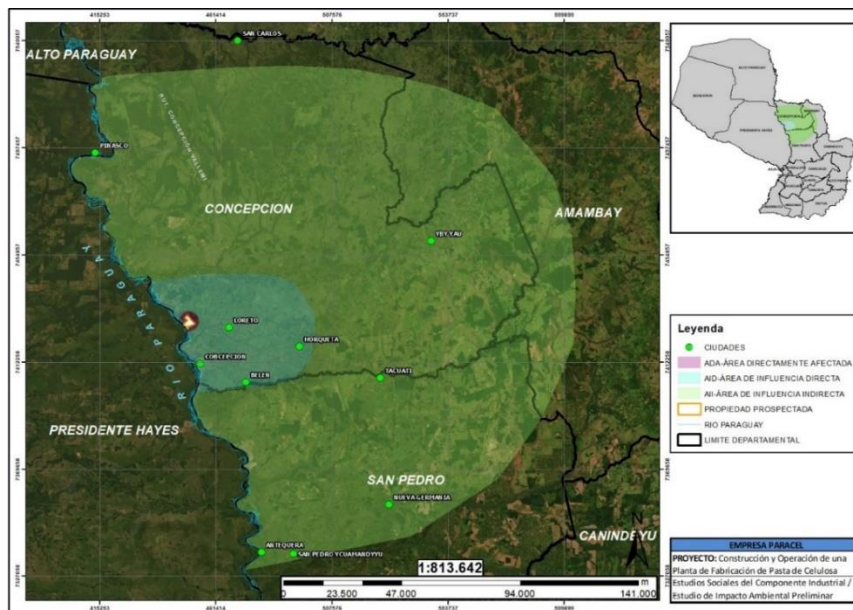

These strategies and intervention programs were built based on forestry, industrial and indigenous community baseline studies, which were used to delimit PARACEL S.A.'s areas of influence:

- Area of Direct Influence (AID) of the industrial component:** Includes 4 districts near the Industrial Plant site, including 18 communities within a 13 km radius of the site. These territories are as follows: Concepción, Belén, Horqueta and Loreto, and the communities/localities: L. Petit, Col. Mongelós, Jhugua Zarzo, Laguna Plato, Mongelós Purity, Piquete Cue, Jhugua Gonzalez, Callejón San Luis, Mbocayaty, Callejón San Ramón, San Antonio, Curuzu Ñu, Costa Pucu, Paso Ita, Ko'ê Porâ, Costa Ferreira, Saladillo and Colonia Primavera.
- Area of Direct Influence (AID) of the forestry component:** Includes 7 districts in which the areas of the project's forest plantations and the main access roads to them are located, including 16 neighboring communities. These territories are as follows: Sargento José Félix López, Paso Barreto, Loreto, San Alfredo, Horqueta and Arroyito in the department of Concepción; the district of Bella Vista Norte in the department of Amambay and its communities/localities: Isla Hermosa (Isla Tuyú), locality of Paso Barreto, Colonia Jorge Sebastián Miranda (Jhugua Ñandu), Estribo del Plata, Puentesíño, Laguna Cristo Rey, Anderi, Islería, Virgen del Camino, Jhugua Guasu, Jhugua Po'i, Santísima Trinidad, Paso Mbutu, Calle 15, Dominguez Nigó, and Ayala Cué.
- Directly Affected Area (DAA) of the industrial component:** Social units and communities located in the immediate surroundings of the Industrial Plant installation, within a radius of 1 km. Includes a micro-territory called Piquete Cue.
- Area of Direct Influence (AID) of the indigenous component:** it is made up of indigenous communities located between 1 to 15 kilometers from Paracel S.A.'s projects that could be affected by the project. The indigenous communities identified are of the Pa'i Tavyterã and Mbya Guaraní ethnic groups and a multicultural indigenous community made up of indigenous people of different ethnic groups, mainly from the Maskoy language. The indigenous communities identified are: Redención, Jeguahaty, Vy'a Renda, Takuarendyju, Takuarita, Sati, Guyra Ñe'engatu Amba, Mberyvo, Yvyty Rovi, Apyka Jegua.

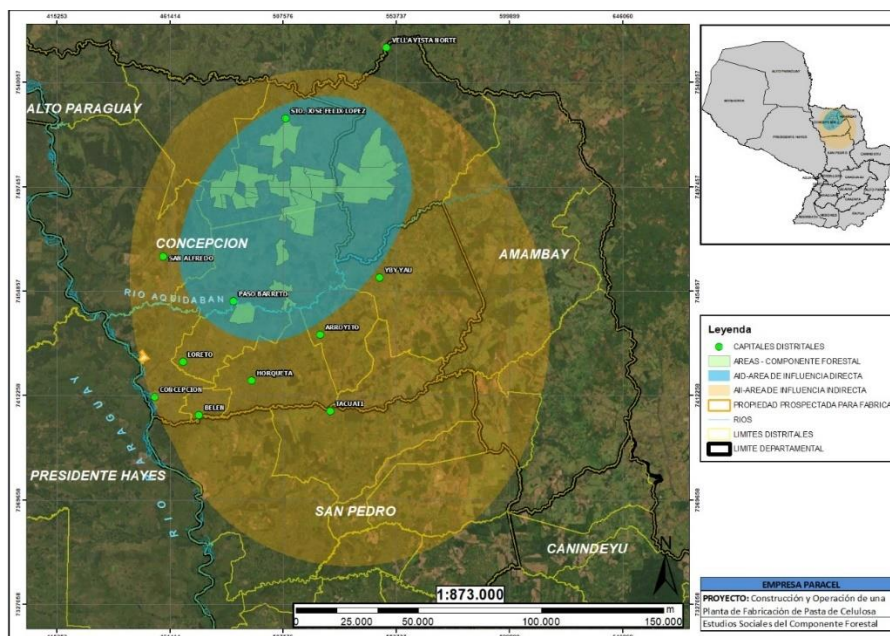

- **Area of Indirect Influence (All):** Includes the departments of Concepción, San Pedro, and Amambay in the Eastern Region of Paraguay.

The following are maps of the project's areas and influence:

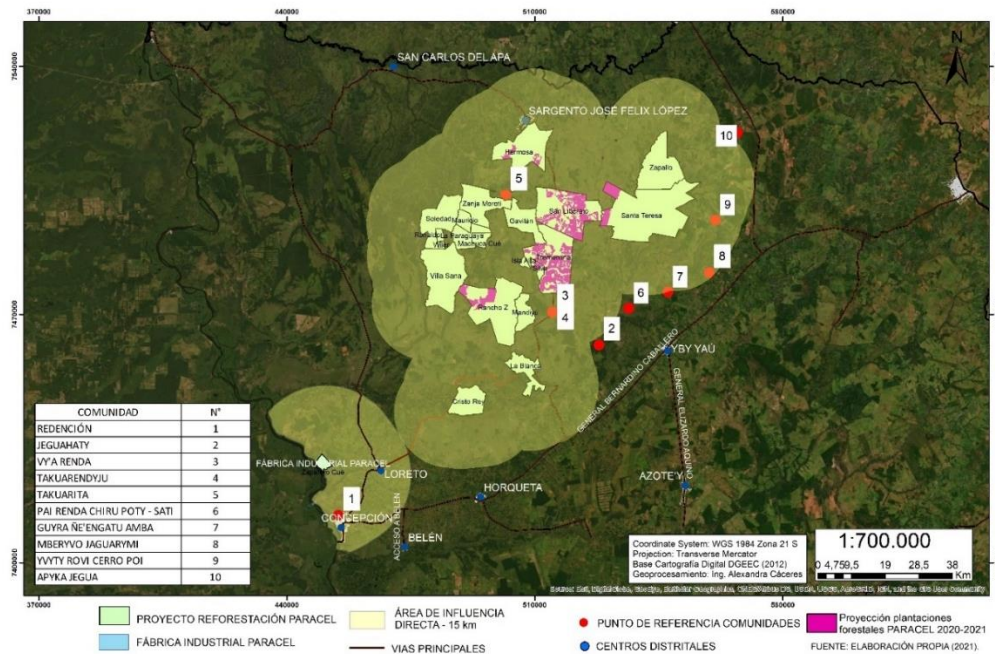

**Map N°1: Areas of Influence of the Industrial Component**

**Map No. 2: Areas of Influence of the Forestry Component**

**Map N° 3: Areas of Influence Indigenous Communities**

## 2. REGULATIONS AND REQUIREMENTS.

PARACEL S.A. is committed to carry out its activities in an environmentally and socially responsible manner, to generate value and create opportunities for society and the country. This environmental and social commitment is based on the following guiding principles:

- Full compliance with national legislation and international standards to which it adheres.
- The adoption of the best industrial and forestry practices, the incorporation of the best available techniques and the practice of continuous improvement.
- The vigilance for the health and safety of its workers, equal opportunities and the promotion of non-discrimination based on gender, religion, ethnicity, race, sexual orientation, social condition or any other, within the framework of full respect for human rights.
- Proactive commitment to the care of the environment in its triple physical, biotic and anthropic dimension, within the framework of sustainable development.
- Preventive and permanent management of environmental and social impacts.

	<b>PLAN FOR RELATIONS WITH THE COMMUNITY AND OTHER SOCIAL ACTORS</b>	CODE: PL/SS/ASO
		DATE: 06/08/2021
		VERSION: 00
		PAGE: 6 OF 78

- The establishment of long-term relationships with local communities, social actors and other stakeholders, characterized by seriousness, transparency and respect.

To put these principles into action, it follows its Sustainability Policy, which includes environmental and social issues, enabling dialogue with its stakeholders, generating shared value and establishing indicators to measure social, environmental and economic impacts.

The following are the national and international regulations that will be considered by Paracel in the relationship with its stakeholders:

**Table 1.** National Regulations

Thematic	Legal Instrument / Description
National Constitution	<p>Chapter II, "Freedom", Title II, Part I, Book One, of the Constitution contains the articles that enshrine freedom of the press and related rights:</p> <p><i>Freedom of expression and of the press, Art. 26:</i> Freedom of expression and freedom of the press, as well as the dissemination of thought and opinion, are guaranteed without any censorship whatsoever, with no limitations other than those provided for in this Constitution; consequently, no law shall be enacted that makes them impossible or restricts them. There shall be no press crimes, but rather common crimes committed through the press.</p> <p>Everyone has the right to generate, process or disseminate information, as well as to use any lawful instrument suitable for such purposes.</p> <p><i>Use of the mass media, Art. 27:</i> The use of the mass media is of public interest. The law shall regulate advertising for the better protection of the rights of children, young people, illiterate people, consumers and women.</p> <p><i>Right to be informed, Art. 28:</i> <b>The</b> right of individuals to receive truthful, responsible and fair information is recognized.</p> <p>Any person affected by the dissemination of false, distorted or ambiguous information has the right to demand its rectification or clarification by the same means and under</p>

	the same conditions as it was disseminated, without prejudice to other compensatory rights.
Socio- Environmental Impact Assessment	<p><b>Decree No. 453/13</b> <i>Regulating Law No. 294/1993 "On Environmental Impact Assessment" and its amendment, Law No. 345/1994, and repealing Decree No. 14,281/1996.</i></p> <p><i>Art. 6. d)</i> Within ten working days after the deadline for submitting or replying to comments, observations or objections, the General Directorate of Environmental Quality Control and Natural Resources -DGCCARN will decide whether to convene a public hearing. The public hearing will be mandatory if the work or activity project may directly affect indigenous communities or when it has been requested by neighbors or by those potentially directly affected. Except in these cases, silence on the part of the DGCCARN will imply the decision not to hold the public hearing. If a public hearing is called, no more than 30 working days may elapse between the decision to call it and its completion, so the date of its realization must contemplate eventual intermediate quarters. Once this period has elapsed, the DGCCARN shall proceed in accordance with Section E) of this article. Exceptionally, if due to climatic circumstances or the remoteness of the place where the hearing is to be held this term is insufficient, it may be extended, once only, for up to ten more working days.</p> <p><i>Art. 7°. b)</i> The expenses to be incurred for the hiring of consultants, publication in newspapers, broadcasting on radio stations and the holding of public hearings shall be borne by the person responsible for the works and activities or the projects thereof. He or she shall also pay the fees authorized by law and established by regulation by SEAM.</p> <p><b>Resolution No. 640/14</b> <i>Establishing the General Regulations for Public Hearings within the framework of Law 294/93 on Environmental Impact Assessment, and its Regulatory Decree No. 453/13 and Amending and Expanding Decree No. 954/13.</i></p> <p><i>Art. 2°.</i> The purpose of the Public Hearing is to allow and promote an effective and transparent citizen participation through a fluid, orderly and productive communication between the national, departmental and municipal authorities and the citizens (individuals and social organizations), so that the information, observations or objections expressed by the participants with respect to the subject of the hearing are</p>

		VERSION: 00
		PAGE: 16 OF 78

Thematic	Description
	<p>affected to bring the problem to the organization's attention and seek redress, without forfeiting their right to use available legal mechanisms.</p> <p><b><i>Topic 3 on labor practices: Social dialogue</i></b></p> <p>Social dialogue includes all types of negotiation, consultation or exchange of information between representatives of governments, employers and workers on matters of common interest in relation to economic and social issues. It may be between employer and employee representatives on matters affecting their interests and may also include governments when dealing with broader issues, such as national legislation or social policies.</p> <p>On some occasions, social dialogue may deal with contentious issues, in which case the parties may establish a dispute resolution process. Social dialogue may also relate to grievances for which a grievance mechanism is important, particularly in countries where fundamental labor principles and rights are not adequately protected.</p> <p><b><i>Theme 7 on Active Participation and Community Development: Social Investment</i></b></p> <p>Social investment occurs when organizations invest their resources in infrastructure and other programs aimed at improving social aspects of community life, such as sanitation, safe drinking water, health, housing and food security. Social investment is a means by which organizations can contribute to the development of the communities in which they operate. In general, social investments are activities that are not directly associated with or designed to improve an organization's core operational activities. However, social investments are generally designed to sustain and improve an organization's relationships with its communities.</p> <p>When identifying opportunities for social investment, an organization should align its contribution with the needs and priorities of the communities in which the organization operates. Information sharing, mentoring and negotiation are useful tools in a participatory approach to identifying and implementing social investment.</p>

For all Paracel's interventions in its various components, it is responsible for consulting, informing and dialoguing with its stakeholders in all phases of project execution, from design, through construction and then operation.

		PAGE: 17 OF 78

Paracel is committed to maintaining a continuous, broad, and inclusive process of engagement with social actors through dialogues, meetings, encounters, consultations and other activities described in the socio-environmental programs developed by the organization based on the principles and regulations described in this section.

### 3. SUMMARY OF PREVIOUS RELATIONSHIPS WITH STAKEHOLDERS.

Paracel has initiated the relationship with its different stakeholders from the very beginning of the project design phase, promoting the approach and involvement of the social actors in all its areas of influence, so the following is a summary of the previous actions with the social actors:

**Table 3.** Summary of Previous Activities

Topics Covered	Public	Summary of activities <sup>9</sup>
Socialization of the Paracel project, presentation of the Socio-environmental Impact Studies, Social and Environmental Programs and coordination of actions for the implementation of the Programs.	<p><b>National Government:</b> Ministry of Labor, Employment and Social Security, Ministry of Public Health and Social Welfare, Instituto Paraguayo del Indígena, National Traffic and Road Safety Agency, National Electricity Agency, National Secretariat of Culture, National Secretariat of Tourism, Ministry of Environment and Sustainable Development, National Police, Ministry of Education and Science, National Service of Professional Promotion, Ministry of Public Works and Communications, 911 System.</p> <p><b>Local Government:</b> Governor's Office of Concepción, Municipalities of Concepción, Loreto, Paso Barreto, Horqueta, Belén, Sgt. Socialization of the Paracel project, presentation of the Socio-environmental Impact Studies, Social and Environmental Programs.	National and international population	3
Socialization of the Paracel project, presentation of the Socio-environmental Impact Studies, Social and Environmental Programs.	Catholic Church (Bishop of Concepción and Parish Priest of Sargento José Félix López)	2

**Reference:** from July 2019 to May 2021

For further references, please refer to the attached document **Stakeholder Engagement Table**, which is a summary document of all meetings and actions carried out to date with the different stakeholders.

In this process of relationship with the community and other social actors, Paracel also uses its social networks<sup>10</sup>, website<sup>11</sup> and<sup>12</sup> specific emails as means of communication.

A large part of the communication process with stakeholders took place during the pre-construction stage of the industrial plant and the installation stage of the forestry component as part of the project's disclosure process and the social baseline studies; however, this is a process that is ongoing in accordance with Paracel's Communication Plan and Socio-environmental Programs.

#### 4. STAKEHOLDER EXPECTATIONS

It should be noted that, as with any project with a social impact, the discourse surrounding the project generates expectations among the indigenous and non-indigenous population, which will be considered for proper implementation.

	<b>PLAN FOR RELATIONS WITH THE COMMUNITY AND OTHER SOCIAL ACTORS</b>	CODE: PL/SS/ASO
		DATE: 06/08/2021
		VERSION: 00
		PAGE: 20 OF 78

#### 4.1. Indigenous Communities

In the field activities with Indigenous Communities, it was observed that the families of the communities belonging to the IDA expressed expectations related to the project, some of them directly related to the stages of the Forestry and Industrial components and others that are more related to basic needs of the families, such as "access to drinking water" and "food security", as well as "literacy" and "security needs related to the preservation of nature" and the "availability of natural resources".

The following is a summary of the main expectations expressed by the indigenous communities within Paracel's area of influence. There is a great coincidence between the expectations of the communities, as they share the same needs, mainly in terms of basic services such as drinking water, electricity, education and documentation:

- ID cards, Indigenous Card and Birth Certificate for members of the community.
- Access to wells and pipes for potable water distribution throughout the community.
- Access to the electric power distribution system for all members of the community.
- Access to jobs or fixed sources of income for community members.
- Technical support and financing for productive activities.
- Access to housing materials, mainly sheet metal.
- Improvement of Improvements to the infrastructure of the community school. internal roads.
- Care and protection of natural resources.

#### 4.2. Non-Indigenous Population

The opinions and expectations surveyed from the population regarding the improvements and/or opportunities that the project would bring to the area of influence are presented below; most people stated that they "consider the project to be positive", indicating that it could "generate sources of work/hire local labor", "local development", "movement of the local economy", and "greater opportunity/possibility for the people".

In the consultations carried out with local and institutional actors, the interest of local representatives (especially from Concepción) in providing jobs to "local companies" has been raised, giving as an example other ventures developed in the department, in which "large companies from Asunción" have participated. Expectations at the national and local government level are positive, and they have expressed their support for the development of the project.

In general, these high expectations occur in the context of the great needs existing in the IDA of the forestry and industrial component, mainly due to the lack of sources of work in the communities, the existence of sporadic, poorly paid jobs, poverty (income and structural) and inequality, and migration and uprooting in search of opportunities.

	<b>PLAN FOR RELATIONS WITH THE COMMUNITY AND OTHER SOCIAL ACTORS</b>	CODE: PL/SS/ASO
		DATE: 06/08/2021
		VERSION: 00
		PAGE: 21 OF 78

In addition to the expectations considered positive; and, as in the industrial component, expectations may be generated in the population related to desires for support from the project to cover certain basic needs of the communities of the IDA in terms of infrastructure and services, thus supplementing the functions of service provision and/or attention that should be provided by the local and national governments.

Among the main concerns regarding the project were "that it be sustainable", the "possible contamination/affection of natural resources", that it be "socially responsible", that "with sources of employment they will not compensate for the damage they may cause if they contaminate", "that it be installed in a suitable location". As aspects that should be considered for the project, people mentioned "care for the environment". In addition, people have mentioned as suggestions for the project the "care and protection of health", the need to "maintain communication and links with the community (more outreach, meetings, opinions and debates)" and "respect for current environmental regulations".

#### 4.3. Other Audiences<sup>13</sup>

There is a great coincidence among the expectations mentioned, such as: "that it is sustainable", "possible contamination/affection of natural resources", "social responsibility", "that it complies with the law", "possibility of generating employment at national and local level", "hiring local suppliers", "generation of a great positive impact on the socioeconomic development of the country".

Paracel will make every effort within its possibilities to meet the expectations and fears of the general population, without falling into assistentialism for the satisfaction of needs, but rather, in the permanent and honest search to develop synergies with the communities that promote the construction of solid, collaborative, and lasting relationships based on commitment and mutual trust.

## 5. SOCIAL ACTORS INTERESTED IN THE PROJECT.

To map the different stakeholders directly or indirectly affected by the development of the project, Paracel used the *Basic Stakeholder Typology* and identified stakeholders for each typology, as illustrated in the table below:

---

<sup>13</sup> Civil Society Organizations, Trade Unions, Environmental Organizations, Suppliers, National and Local Government, Academia, etc.

	<b>PLAN FOR RELATIONS WITH THE COMMUNITY AND OTHER SOCIAL ACTORS</b>	CODE: PL/SS/ASO
		DATE: 06/08/2021
		VERSION: 00
		PAGE: 22 OF 78

**Table N° 4. Stakeholder Classification**

Position	Sector	Purpose / Main scope of action	Representatives (social actors)
Control Organism <sup>14</sup>	Public sector	Environment	Ministry of Environment and Sustainable Development (MADES)
		Employment	Ministry of Labor, Employment and Social Security (MTESS)
		Security	Ministry of the Interior
		Indigenous Communities	Indigenous Institute (INDI)
		Environment	National Service for Plant and Seed Quality and Health (SENAVE)
		Economy	Naval Prefecture
		Environment	Secretary of State for the Environment, Economic Development, Production and Family Agriculture (SEMAGRO)
		Routes	National Department of Transportation Infrastructure (DNIT)
		Economy	Secretaria de Receita Federal do Brasil (RFB) Secretary of Foreign Trade (SECEX)
Project Decision <sup>15</sup>	Public sector	Economy	Ministry of Industry and Commerce (MIC)
		Civil works	Ministry of Public Works and Communications (MOPC)
		Health	Ministry of Public Health and Social Welfare (MSPyBS) / USF (Family Health Unit)
		Health	Social Security Institute (IPS)
		External relations	General Directorate of Migration
		Security	National Police
		Economy	National Customs Directorate (DNA), National Administration of Navigation and Ports (ANNP), National Customs Authority (DNA), National Administration of Navigation and Ports (ANNP).
		Environment	National Electricity Administration (ANDE)
		Governance	Governorates: Concepción and Amambay

<sup>14</sup> Because of their role, they are involved in aspects relevant to the project. Thus, important attention must be paid to compliance with the requirements, expectations and/or standards established by these actors/instances.

<sup>15</sup> Stakeholders on whom project-related decisions may depend, usually with a high capacity of influence and interest.

### 5.1. Stakeholder Categorization

After the classification of the Stakeholders, progress was made with their categorization based on two methodologies; the *Stakeholder Identification Theory through the Power, Legitimacy and Urgency* represented by each one of them (R Mitchell, B Agle and D Wood, 1997) and the mapping of stakeholders based on a *Power-Risk matrix* (Savage, Nix, Whitehead & Blair - 1991). Both methodologies are described below:

#### 5.1.1. Identification of Interested Parties through Power of Attorney, Legitimacy, and Urgency.

This model was developed by Mitchell, Agle and Wood, where they propose a Venn diagram in which the variables power, legitimacy and urgency are related. The variable *Power* means the Stakeholder's capacity to influence the organization. The *Legitimacy variable* refers to the relationship and actions of the Stakeholders with the organization in terms of desirability, ownership or convenience and the *Urgency refers* to the requirements that they pose to the organization in terms of immediate attention.

The combination of these three attributes in different compositions leads to seven types of stakeholders: latent, discretionary, claiming, dominant, dangerous, dependent and definitive. The importance of the stakeholder will increase with the attributes it possesses.

	<b>PLAN FOR RELATIONS WITH THE COMMUNITY AND OTHER SOCIAL ACTORS</b>	CODE: PL/SS/ASO
		DATE: 06/08/2021
		VERSION: 00
		PAGE: 27 OF 78

**Table N° 5.** Description of the 7 types of Stakeholders

TYPES OF STAKEHOLDERS	
<b>Inactive</b>	They possess power, but not demand or a legitimate link with the organization, they are willing to acquire a second attribute to make use of their power.
<b>Discretionary</b>	His relationship with the organization is philanthropic. It does not have power or urgent demands.
<b>Demanding</b>	They have demands, but do not have the power, i.e., sufficient strength or social recognition to have their demands met.
<b>Dominant</b>	Due to the legitimacy and power they have in expressing their interests, expectations and demands, the organization considers them important; however, as they lack urgency, their attention is not usually immediate.
<b>Dangerous</b>	Their relationship with the organization can be coercive, because it can be imposed with the use of power.
<b>Dependent</b>	Lacking power, they depend on other interest groups for their demands to be met.
<b>Definitive / Priority</b>	They have a high impact on the organization's decisions and their demands are the first to be met.

**Table N°6.** Categorization of Stakeholders according to the number of attributes

Stakeholder Category	Importance	Attributes	Subcategory of Stakeholders
<b>Latent (1 attribute)</b>	Under	Legitimacy	Discretionary
		Power of Attorney	Inactive
		Urgency	Demanding
<b>Expectant (2 attributes)</b>	Moderate	Power and Legitimacy	Dominant
		Legitimacy and Urgency	Dependent
		Power and Urgency	Dangerous
<b>Definitive (3 attributes)</b>	High	Power, Legitimacy and Urgency	Priority

To obtain the results of the categorization of the stakeholders, the power matrix, the urgency matrix and the legitimacy matrix must be drawn up to then form the consolidation matrix where the data are unified. The data are quantitative, but they are the results of the weighting developed by the Paracel team.

### 5.1.2. Power - Risk Matrix

This tool allows us to prioritize the different groups according to the nature and severity of the impacts, and the capacity of these groups to influence project management. This matrix identifies 4 stakeholder categories according to the following table:

**Table N° 8. Stakeholder Category**

MAGNITUDE		GRADE	INTERPRETATION
POWER	RISK		
6-10	1-5	High power / low risk	<b>Supporting stakeholder:</b> this is the figure that supports the organization's strategies, so it is the desired type.
6-10	6-10	High power / high risk	<b>Mixed interest group:</b> this is the most important, as it offers both a high level of assent and a high level of opposition.
1-5	1-5	Low power / low risk	<b>Marginal interest group:</b> it is indifferent to the strategies, i.e., it is neither inclined to hinder their development nor to collaborate.
1-5	6-10	Low power / high risk	<b>Non-supportive stakeholder:</b> this has a high potential to threaten the organization and a low potential to support it.

**Table N° 9. Power - Risk Matrix**

N°	Position	Sector	Risk	Power of Attorney	Type of Stakeholder	Strategy
1	Control Organism	Public sector (Ministries, Secretariats, etc.)	8	7	Mixed	Collaborate
2	Project decision	Public sector (Ministries, Secretariats, etc.)	5	8	Support	Involve
3	Interest in the project	Public sector (Ministries, Secretariats, etc.)	1	7	Support	Involve
4	Interest in the project	Private Sector (Guilds)	1	7	Support	Involve
5	Interest in the project	Private Sector (Media)	6	8	Mixed	Collaborate
6	Interest in the project	Civil Society Organizations (Environment)	6	5	No Support	Communicate
7	Potential Beneficiaries / Potential Affected	Civil Society Organizations (Indigenous Communities)	5	9	Support	Involve
8	Interest in the project	Civil Society Organizations (Inclusion / Sustainability)	1	6	Support	Involve

	<b>PLAN FOR RELATIONS WITH THE COMMUNITY AND OTHER SOCIAL ACTORS</b>	CODE: PL/SS/ASO
		DATE: 06/08/2021
		VERSION: 00
		PAGE: 30 OF 78

9	Interest in the project	Academia, educational and research institutions	1	6	Support	Involve
10	Interest in the project	Religious institution	8	5	No Support	Communicate
11	Potential Beneficiaries / Potential Affected	Micro territories	5	9	Support	Involve
12	Potential Beneficiaries / Potential Affected	Suppliers	1	7	Support	Involve
13	Potential Beneficiaries / Potential Affected	Collaborators	1	8	Support	Involve
14	Project decision	Shareholders (investors)	1	10	Support	Involve
15	Project decision	Investors (banks)	1	9	Support	Involve
16	Potential Beneficiaries	Communication and Monitoring Committee	2	6	Support	Involve
17	Interest in the Project	Civil Society Organizations (Forestry Sector - Brazil)	8	8	Mixed	Collaborate

Power and risk levels are based on the following interpretation tables:

**Table N° 10.** Interpretation of Risk Levels

LEVEL	RISK CRITERION	VALUE
<b>None</b>	The stakeholder presents a high degree of articulation and integration with the company's strategies.	<b>1 to 2</b>
<b>Under</b>	The stakeholder has a cooperative disposition, which has a positive impact on the development of the company's economic and sustainability strategies.	<b>3 to 5</b>
<b>Medium</b>	The stakeholders involved lack motivation to support and integrate with the company's economic and sustainability strategies.	<b>6 to 8</b>
<b>High</b>	The stakeholder has a hostile disposition that has a negative impact on the development of the company's economic and sustainability strategies.	<b>9 to 10</b>

**Table N° 11.** Interpretation of Power levels

LEVEL	POWER CRITERION	VALUE
<b>None</b>	The stakeholder has no real economic, social or political influence to promote the company's economic and sustainability strategies.	<b>1 to 2</b>
<b>Under</b>	The stakeholder has a moderate degree of economic, social and political influence that can potentially contribute to the company's economic and sustainability strategies.	<b>3 to 5</b>
<b>Medium</b>	The stakeholder has a very relevant degree of economic, social and political influence and is key to shaping the company's economic and sustainability strategy.	<b>6 to 8</b>

	<b>PLAN FOR RELATIONS WITH THE COMMUNITY AND OTHER SOCIAL ACTORS</b>	CODE: PL/SS/ASO
		DATE: 06/08/2021
		VERSION: 00
		PAGE: 31 OF 78

<b>High</b>	The stakeholder has great economic, social and political influence and mobilization capacity to implement the company's economic and sustainability strategies.	<b>9 to 10</b>
-------------	---	----------------

The results obtained are monitored by the Communications and Social Sustainability area to update the data (categorization) and the stakeholder engagement strategy.

At this stage of the project, an analysis by stakeholder category was chosen. As the project progresses, individual analyses of each stakeholder will be carried out, as Paracel will have more experience and information about the behavior of the specific stakeholder group.

## 6. STAKEHOLDER RELATIONS PROGRAM

Paracel S.A. aims to provide clear and relevant information about the project to the general population, focusing on indigenous communities and communities living in the areas of influence of the project, to maintain and ensure constant and timely communication and interaction with them.

To this end, it establishes the pertinent procedures, framed in its **DISSEMINATION AND COMMUNICATION PROGRAM, SOCIAL MONITORING PROGRAM, as well as in the PLAN FOR CONNECTING WITH STAKEHOLDERS.**

The same documents establish the parameters for the use of methodologies for consultation with the different social actors, as well as the description of the activities to be developed with them, and the records of these and of the agreements reached.

In addition to the aforementioned documents, Paracel has plans and programs designed and conceived from the perspective of the relationship with the community and other social actors, which are focused on issues related to health, safety, environment, and social issues. The complete description of each plan and program can be found in the reference document indicated in *table N° 11*. The complete list of the programs of the social and environmental management system can be found in the document ***LI/CO/DOC - List of Documents in Force of the Management System.***

				Make a final judgment regarding the efficient use of resources and the actual contribution of the program to solving problems. Contributing to knowledge in social and economic sciences.
6	PR/SS/PDP	Local Supplier Development and Promotion Program	SS	Promote the development and growth of the local economy through the promotion of local and national companies as possible suppliers.
7	PR/SS/MSC	Social Management Program	SS	Identify the effects generated from the definition of the design of the work and accesses, seeking to minimize the effects of the ADA population, with emphasis on vulnerable groups.
8	PR/SS/MSO	Social Monitoring Program	SS	Monitor the implementation of the measures and programs established in the PGS through the definition and monitoring of performance indicators, so that inconveniences in meeting the objectives set can be identified in time and allow corrective actions to be taken in a timely manner. This program also contains a subcomponent for monitoring social perception through which it will be possible to have updated information regarding opinions and expectations of the local population on aspects related to the project in its different stages.
9	PR/SS/SSC	Community Health and Safety Program	SS	-Implement an efficient program to promote the care of hygiene, safety and health of the population with emphasis on the prevention of diseases that could be related to the increase in the population of workers. Prevent and mitigate the negative impacts on health and safety that indigenous communities could face as a result of the company's activities.
10	PR/SS/AAE	Internal Management Program for Land Affectation and Risks by External Agents	SS	Prevent conflicts with third parties (owners of properties used as easements) and outline internal protocols to guarantee the safety of Paracel staff.
11	PR/SS/CON	Awareness and Follow-Up Program for Contractors and Workers Regarding Compliance with Regulations	SS	-Accompany and monitor contractors and workers to ensure compliance with national and international regulations. Monitor compliance with good practices of indigenous inclusion in Paracel's value chain.

12	PR/SS/DCO	Dissemination and Communication Program	SS	Provide clear and pertinent information about the project to the general population, with a focus on indigenous communities and resident communities in the project's areas of influence, in order to maintain and guarantee constant and timely communication with them.
13	PR/SS/PCU	Protection and Valorization of Cultural Heritage Program	SS	Ensure the safeguarding and valorization of the assets of Paracel's Area of Direct Influence.
14	PT/SS/HFO	o Fortuitous Findings Protocol	SS	Establish the reference framework and guidelines for the protocol of fortuitous finds of paleontological, archaeological, architectural and/or underwater elements, in Paracel SA's areas of operations in its forestry, industrial and logistical components; in order to: -Ensure a sustainable management of heritage, promoting the enhancement of heritage and culture in the Department of Concepción. Protect the cultural heritage of the area of influence of the Paracel SA Project. Contribute to knowledge in social sciences.
15	PR/SS/RCI	Community Relationship and Social Investment Program	SS	-Encourage local development and promote close ties between the communities and the company. Improve the production and innovation capacity to add value to the income-generating activities of indigenous families.
16	PR/SS/SEV	Road Safety Program	SS	Reduce the probability of the occurrence of road accidents and the impact on the way of life of the communities surrounding the plant and the properties for forest plantations, caused by the increase in traffic.
17	PR/SS/MDO	Development and Linkage with the Local Workforce Program	SS	Promote the generation of local employment through the linking of qualified and unskilled labor from the area of influence of the project and the development of capacities. Promote the labor inclusion of people from indigenous communities in Paracel and the ventures of its value chain.
18	PR/SS/MUJ	Women Empowerment Program	SS	Empowering indigenous women to bridge gender and ethnic inequality gaps.

HEALTH & SAFETY			
19	PL/TH/ACO	Workers Accommodation Plan	TH The objective of the Worker Accommodation Plan is to ensure the promotion of healthy, safe, and comfortable accommodations without negatively affecting the surrounding communities.
20	PL/TH/INF	Workers Influx Management Plan	TH The objective of the Worker Influx Management Plan is to provide a clear set of actions for the mitigation, management, monitoring and evaluation of impacts related to the migration generated by Paracel and by the expectations of people in search of opportunities.
21	PT/TH/COV	Covid-19 Prevention Protocol	TH This protocol seeks to achieve a high level of effectiveness in the prevention, detection and response of suspected or confirmed cases of COVID-19, by presenting information on this disease, control measures and proposals for actions.
22	PL/TH/RED	Post Construction Retrenchment Plan	TH The objective of the Job Reduction Management Plan is to provide a set of actions to manage the dismissal process in a socially responsible manner and in accordance with international standards and best practices.
23	PR/TH/IGU	Equal Opportunity and Non-discrimination Program	TH Guarantee the application of binding actions to the policy of Equal Opportunities and Non-Discrimination, of the developing population and direct and indirect execution to Paracel; covering transversely the components that are part of it.
24	PL/TH/EME	Emergency Preparedness and Response Plan	TH The Emergency Preparedness and Response Plan is an integral part of Paracel S.A.'s Socio-environmental Management System and aims to establish a set of measures and procedures to minimize the probability of occurrence of a threat or emergency, mitigate the impact if the event occurs, recover from the emergency and resume normal operations.
25	MA/TH/SEG	Corporate Security management Manual	TH Protect the human life. -Orient the actions of the company to mitigate and offer protection against the relative risks to the security that could constitute a threat for the communities, the collaborators, the installations and the capacity to operate, as also for the reputation of the company in its operations in the world-wide field.

- **XXX:** Three letters or number or a combination of both, to facilitate the identification of the document.

## 7. CALENDAR OF ACTIVITIES

The implementation of the actions described in the calendar of activities is based on the following *Key Principles of Effective Participation*:

- Evaluate, whenever necessary, the social and environmental risks and impacts to communities that may be affected by actions or decisions of the company or its allies.
- The approach must be carried out through a relationship of equals, based on the recognition of diversity and in the language spoken by the community.
- Provide meaningful information in a format and language that is easily understandable and tailored to the needs and requirements of the specific stakeholder group.
- Provide timely and clear information prior to any consultation or decision-making activity.
- Respect the traditions, languages, timeframes, and decision-making processes of each community.
- Promote two-way dialogues that provide opportunities for both parties to exchange opinions, information, complaints or suggestions.
- Facilitate the inclusion of women, people with disabilities and other vulnerable and/or minority groups in the dialogue and presentation of opinions.
- Guarantee free dialogue processes.
- Establish clear mechanisms for responding to complaints, suggestions and inquiries.
- Establish feedback processes in program design and inform stakeholders.
- Communications transmitted through indirect or mass channels, such as e-mail, web pages, online publications, radio and television, have the capacity to transfer

	<b>PLAN FOR RELATIONS WITH THE COMMUNITY AND OTHER SOCIAL ACTORS</b>	CODE: PL/SS/ASO
		DATE: 06/08/2021
		VERSION: 00
		PAGE: 39 OF 78

information quickly and effectively to different audiences in a consistent manner. However, these should complement and not replace personal (face-to-face) communication.

- Direct communication should be, as far as possible, the most important form of communication, because it stimulates dialogue and an open and trusting environment. This does not prevent Paracel from using mass media to achieve a greater reach in its communications.
- Common sense, good manners, courtesy, respect and tolerance are rules that must be followed in the daily relationship between the company and its stakeholders, either directly or indirectly, since, in either case, there are people who are receiving the message.
- Respect people and their privacy.
- Avoid any type of racial, social, political, religious discrimination or discrimination based on nationality, gender or age.

#### 7.1. Calendar

Paracel has established corresponding calendars for the development of activities with its different stakeholders. Due to the large number of activities and specific actions, they have been described in the Social Programs, including the Indigenous Peoples Plan, in the item *Schedule*, where the deadlines and months of execution to be considered according to the nature of each program are detailed.

## 8. RESOURCES AND RESPONSIBILITIES

Although the Communication and Social Sustainability area leads everything related to the implementation of the Social Programs, as well as the relationship with the different stakeholders of the company, the actions are developed jointly with other areas of the organization, as follows is the basic structure<sup>18</sup> of the area:

### 8.1. Functions by Position

The following is a summary of the main functions of each position. For more details, please refer to the ***Profile and Position Description Sheets*** for each team member.

<sup>18</sup> Structure planned for the coming months.

	<b>PLAN FOR RELATIONS WITH THE COMMUNITY AND OTHER SOCIAL ACTORS</b>	CODE: PL/SS/ASO

## 8.2. Social Specialists

Paracel foresees the hiring of organizations, consultants and specialists to address specific issues such as work with children, women, people with disabilities, indigenous communities, among others.

Within the framework of Sustainable Development Goal 17 "*Partnerships to Achieve the Goals*", Paracel will also seek to develop strategic alliances with institutions and organizations specialized in different social and environmental issues.

## 9. COMPLAINT MECHANISM

The Complaints, Suggestions and Consultations Management Program PR / SS / QRI guarantees due attention and response to complaints, suggestions and consultations from own and external workers, indigenous peoples and population of the project's areas of influence and common people, establishing communication channels. The main elements of this program are summarized below. The detailed implementation is set out in the ***PC/SS/QSC Procedure for Complaints, Suggestions and Consultations.***

The Communication and Social Sustainability Department, together with the circumstantial committee, are responsible for the attention, treatment and effective closure of complaints, suggestions and/or consultations.

On the other hand, all local stakeholders, residents of the areas of direct and indirect influence of Paracel, authorities, civil society organizations and suppliers, indigenous communities, as well as employees of Paracel S.A. and its contractors, either personally or through legitimate representatives, may submit complaints, suggestions and / or consultations.

This procedure offers protection against any retaliation or discriminatory action that Paracel S.A. may take against the person or organization that submits a good faith complaint, suggestion and/or inquiry. Its access is free of charge.

All reports where required by the complainant or suggester shall be confidential and the anonymous identity of the complainant or suggester shall be preserved.

Regarding the dissemination of the channels for filing complaints, suggestions and/or consultations, for **Indigenous Communities** it will be done through contact with community leaders via telephone (whatsapp and calls) and through the meetings planned and detailed in the social monitoring program. The dissemination of the channels for submitting complaints, suggestions and/or consultations will take place frequently through Paracel's social networks, website and contact networks.

## 10. MONITORING AND REPORTING

For the follow-up of actions and the presentation of reports for the evaluation of impacts achieved, PARACEL S.A. considers for each policy, plan and program the corresponding procedures and reports necessary for the constant monitoring of social, environmental, social and economic indicators.

In summary, the table below details the reporting methodology for all cases:

**Table N° 17.** Summary of Reporting Methodology

ITEM	PERIODICITY	DISPLAY FORMAT
<b>Policies and Plans</b>	Monthly performance reports   <i>Global Reporting Initiative</i> (GRI) Annual Report.	Formats established by PARACEL S.A., in addition to those required by the GRI. Available in digital and physical formats.
<b>Programs</b>	Monthly performance reports, in a format established by PARACEL S.A., which includes the measurement of impacts (including records of periodic meetings with the different stakeholders, training records, audiovisual materials developed, agreements, photographic records, among others (all of them reported according to the activity calendar for each program)).	Formats established by PARACEL S.A. Available in digital and physical media.

For further details and reference, please refer to **PARACEL S.A.'s Social Programs** documents, which constitute the company's guidelines for all actions carried out with the different stakeholders.

In addition, Paracel has an Impact Measurement Instruction whose objective is presented below:

- Establish the reference framework and guidelines for measuring the impact of the social programs implemented by Paracel, in order to:
- Generate information focused on the design or reformulation of implemented programs, to improve performance and results.
- Make a final judgment as to the efficient use of resources and the program's actual contribution to problem solving.
- Contributing to knowledge in social sciences and economics.

**Table N°18.** Summary of Evaluation and Monitoring Stages

Moment of the Program	Tool	Objectives	When to use it?
Program planning	Theory of Change	Explains how the activities of a project or program produce a series of results that contribute to achieving the final intended impacts.	From the identification of actions to the finalization of program planning.
	Baseline	This is information referring to the initial values of the indicators of the problem that gave rise to the program, which are constructed during its delimitation. It is an indispensable parameter for assessing the impacts of the intervention because it makes it possible to compare the situations before, during and after its implementation.	Completion of the planning process.
	Annual operating plan	Program activities, goals and outputs on an annualized basis. It is the basis for monitoring.	Two months prior to the start of each year, with a semi-annual adjustment considering monitoring results.
Program execution	Monitoring	Continuously investigate and analyze the degree to which the activities carried out and the results obtained comply with the plan, in order to timely detect eventual deficiencies, obstacles and adjustment needs in the execution.	During the entire program execution.
	Concurrent evaluation	Evaluate in depth, from an institutional perspective and at a given time, the performance of the program at all levels.	During the execution of the program, when there is a need to deepen the knowledge about its performance.
Completion of the program	Evaluation of results	Evaluate the degree of compliance with the specific objectives of the program.	Immediately after the end of program execution. It can also be performed before the end of the program or after a relevant period of execution.
	Impact assessment	Identify and explain how the initial situation was modified based on the original objective of the program.	Sometime after the end of the program execution.

## **11. MANAGEMENT FUNCTIONS**

To comply with and implement the social, environmental and economic interventions, Paracel is based on the structure presented in point 7.

External services that may be required shall be governed in accordance with the Terms of Reference (TOR) and contracts for this purpose. The actions will be coordinated according to the corresponding area (social and/or communication, in addition to the Purchasing Management).

<b>Knowledge</b>	<b>Reference:</b> (1) Mandatory (determining factor for contracting) (2) Desirable (3) To be developed in-house.

**Clarification:**

In this document the terminology of the generic masculine was adopted to refer to men and women equally. This is a resource that only seeks to provide uniformity, simplicity and fluidity to the composition and reading of the text. It in no way diminishes Paracel S.A.'s commitment to gender equality.
